MATTHEW AKINGBADE

Full Stack Developer

SUMMARY

I am a reliable and creative software engineer.

Experienced Developer professional with strong leadership and relationship building skills.

I have rich experience in Full Stack with over 5+ years of experience.

- Test Driven Development
- Clean architecture
- High quality code
- Deadline focused work
- Open-mind with new technologies and challenges
- Team work & communication
- Market Research
- Competitor Analysis
- Team Management & Organizational Leadership
- Quality Control

KEY SKILLS

React Angular Vue Ruby on Rails Asp.Net Core Spring Boot Laravel Node.JS Express.JS Django
Python C# JavaScript TypeScript Blockchain MongoDB Oracle MS SQL Server MySQL AWS
Github Trello GraphQL PostgreSQL

PROFESSIONAL EXPERIENCE

Full Stack Developer

Sep '22 - Nov '22

Tesora

Remote work

Tech-stack: Asp.Net Core, PostgreSQL, Angular, Blockchain, NFT, DApp, ERC1155, React, Smart Contract

- Developed frontend using React.
- Developed smart contracts with Solidity based on ERC721.
- Implemented mint, transfer logic with Smart contract in Solidity.
- Used Asp.Net core for backend.
- Use PostgreSQL and host it on the AWS service.
- Use FluentValidation, Cronos, Nethereum and Swashbuckle packages.
- Host backend using AWS Elastic Beanstalk.
- Developed admin-frontend using Angular.
- Implemented Login with OpenApi and OpenId.
- Using Ipfs and infra for NFT minting.
- Implemented auction, bid, create and offer login in backend.

Full Stack Developer

Oct '21 - Aug '22

SOLSTICE

Remote work

Tech-stack: Blockchain, NFT, DApp, NextJS, JavaScript/TypeScript, Express.JS, Firebase, Mongo DB, NFT, ERC1155

- NFT minting flow using web3.js.
- NFT Smart Contract with ERC1155 using solidity, truffle, ganache, Kovan test network and main network.
- Product creating flow using IPFS.
- Frontend Project High Quality Structure.
- React Auth Routing using @okta/okta-react library.
- Auth Form using Firebase Google auth, Recaptcha Auth, Phone Auth, Email and Password Auth.
- Email Verification flow using Firebase authentication template.
- Transaction data management using Firebase Real-time database.

- Some security functions development in Firebase Functions using Express.JS.
- [Editing photo] UI of Setting Page using only CSS3 and Canvas(Not Plugin).
- Stripe Payment flow using stripe 3th party API.
- Multi-Digital asset display UI using canvas, pdf-viewer and so on.
- Restricted or Public link sending logic in product page using Twilio, Email JS libraries.
- Parsing CSV files, converting CSV to JSON flow using json2csv and react-csv library in Customers page.

Senior Frontend Developer

Feb '20 - Aug '21

Vinovest

Remote work

Tech-stack: React Native, Flutter, React, Redux-Thunk, Redux-Saga, Styled Components, CSS

- Multiple language platform using i18next library.
- React Auth Routing using @okta/okta-react library.
- Animated UI Button, Dropdown, Select, Modal, Checkbox components using styled-component and CSS(not plugin).
- Navbar component with high structure.
- Landing page Number panel animation CSS.
- Dashboard page Slider component using styled-component and CSS(not plugin).
- Blog page Pagination component using styled-component and CSS(not plugin).
- Redux actions to interact with Express.Js backend.
- High quality code style & project structure.
- Mobile responsive.
- Email verification, Forgot Password, Change Password flow.
- Blog schemas and Relation mapping on backend side.
- Stripe Payment flow using stripe 3th party api.
- Used React JS for creating reusable UI components.
- Created Menus and Drawer component by using Typescript.
- Analyzed code quality and performance with jsHint and YSlow.
- Frontend project hosting using DigitalOcean.

Full Stack Developer

Dec '18 - Jan '20

Anyline.com

Remote work

Tech-stack: React, Django, Python, GraphQL, MySQL, Pandas, Kubernetes, RabbitMQ, Redis

- Worked on developing internal testing tools written in Python.
- Built an innovative E-learning web application with Django and GraphQL.
- Developed entire frontend using React.js framework.
- Performed optimization of test server by implementing multiprocessing for the caching system.
- Improved user experience.
- Actively involved in developing the methods for Create, Read, Update and Delete (CRUD) in Active Record.
- Managed large datasets using Pandas data frames and MySQL.
- Wrote and executed various MySQL database queries from python using Python-MySQL connector and MySQL db package
- Built various graphs for business decision making using Python matplotlib library.
- Used Celery as task queue and RabbitMQ, Redis as messaging broker to execute asynchronous.
- Integrated 3rd APIs such as Stripe payment processing.
- Deployed the web app on kubernetes.
- Collaborated with an agile team, and helped prioritize and scope feature requests to ensure that the biggest impact features were worked on first.
- Spearheaded 100% of code repositories in GitHub and set up automated CI/CD pipeline for all product lines.

Full Stack Developer

May '17 - Nov '18

Because Market

Remote work

Tech-stack: Java, React/Next.JS, Spring Boot, Oracle, Kubernete, AWS, Clouding

- Architected a React/Redux SPA and also implemented the complex business logic.
- Built a portal system and multiple funnels powered by React/Redux allowing users to explore various facets of their management accounts.
- Developed REST API's using Node.js and experienced in using web services like SOAP, REST.
- Responsible for creating efficient design and developing User Interaction screens using HTML5 semantics new tags like audio, video, canvas) CSS3, JavaScript, jQuery, AJAX and JSON.
- Implemented stable React components and stand-alone functions to be added to any future pages.
- Worked on multiple Node.js apps to build RESTful APIs, new features, various issues, and background jobs.
- Integrated various third-party apps (Shopify, Recurly, Sentry, and more) into multiple Node.js apps.
- Refactored the authentication logic and Redux store with Redux's architecture and a Redux auth wrapper.

Full Stack Developer	Jun '15 - Apr '17
Brandscopic	Remote work
<i>Tech-stack: Ruby on Rails, Laravel, Vue.js, MySQL, Coffee Script, Grape, CSS, JavaScript</i>	
- Managed and worked on the back-end (Rails, Laravel) and front-end (JavaScript) development and interacted on a daily basis with the clients and the other developers. - Moved from using Rails controllers to build more scalable/isolated RESTful APIs using Grape and Sidekiq. - While this allowed the application to be more scalable, spent time on reliability by adding many integration/unit tests for the new API. - Developed and maintained the front-end functionality of websites. - Participated in discussions with clients to clarify what they wanted. - Designed prototypes for websites. - Wrote cross-browser compliant XHTML, CSS, JavaScript, and Coffee Script. - Managed simultaneously several databases and reporting tools. - Provided guidance to other team members on web development issues. - Developed websites that have a consistent feel and look throughout all web properties. - Provided technical support to end-users. - Identified and corrected software deficiencies.	

Full Stack Developer	Jun '14 - Apr '15
World Sport Action	Remote work
<i>Tech-stack: React, Redux, Node.js, Express.js, MongoDB, TypeScript</i>	
- Worked as a senior engineer and provided the best solutions. - Built pixel-perfect front-end UI/UX using React, Redux, Typescript, and React Hook. - Built back-end APIs using Node.js. - Implemented middleware for regular check of database using Node.js. - Implemented the script that performs the connections between the device and back-end using Node.js. - Reviewed the pull requests submitted from the other developers for both front-end and back-end. - Helped integrate third-party APIs including Espn and FIFA. - Developed REST API for test server for Express Router middleware-based API's with Mongo DB integration. - Experienced in working with Babel, Gulp, NPM, NPM scripts, and Webpack in application build and deployment processes. - Experienced in writing unit and integration tests for full stack JavaScript applications - Used advanced level of HTML, XML, AJAX, JavaScript, ECMA script 6, CSS and pure CSS layouts.
