

SUMMARY

I am a reliable and creative software engineer.
Experienced Developer professional with strong leadership and relationship building skills.
I have rich experience in Full Stack with over 7 years of experience.
I am expert at MERN stack and deep experience in backend like Node.js, PHP, Asp.Net, Django/Flask, RoR and Golang.
Experience in developing DEFI/CEFI, NFT projects using Ethereum and Solana.

PROFESSIONAL EXPERIENCE

Full Stack & Project Manager

May '22- Present

SOLS

<https://solsapp.com/>

<https://github.com/arthurchen330/SolsApp>

Tech-stack: React/Next.JS, JavaScript/TypeScript, Express.JS, Firebase, Mongo DB, NFT, ERC1155

- Made **UI/UX** design for frontend.
- Use **React**, Material UI for frontend.
- Integrated **firebase** and email authentication logic into frontend.
- Implemented **Smart Contracts** with **Solidity** base on **ERC1155**.
- Buy **NFTs** using the third party API's like **Stripe**.
- Divide company's NFTs into 4 types based on **ERC721** and **ERC1155**.
- Mint company's own token called "SOLS".

Full Stack & Solana Smart Contract Developer

Sep '21- Apr '22

Synesis.one

<https://www.kanon.exchange/>

<https://github.com/arthurchen330/Kanon>

Tech-stack: React/Next.JS, TypeScript, Express.JS, Mongo DB, Blockchain, Web3, Rust, Smart Contract, NFT, Solana

- Developed frontend using **React** and **Sass**.
- Solved page loading time in the frontend.
- Implemented **staking** logic with Solana smart contracts.
- Use **Solana Web3** to interact with Node server.
- **Mint** company's own **Solana** token called "SNS".
- Developed **NFTs** marketplace smart contract using **Anchor Rust** framework.
- Integrated **Rust** based **Solana** smart contract into frontend which includes data yield farming logic.

Full Stack Developer

Oct '20- Aug '21

Telmie.com

<https://Telmie.com/>

<https://play.google.com/store/apps/details?id=com.starcloud.telmie>

Tech-stack: React/Next.JS, Express.JS, Mongo DB, WebRTC, Blockchain

- Have upgraded the video call speed and quality by integrating new **WebRTC** library.
- Implement **blockchain** tech based chat function for safety and private chat.
- Upgraded **Metronic** theme based frontend into **React.js/Next.js** based frontend and speed up, optimize website.

Full Stack & NFT Developer

Apr '20- Sep '20

DoubleDice.com

<https://doubledice.com/>

<https://github.com/arthurchen330/Frontier>

Tech-stack: React/Next.JS, TypeScript, Express.JS, Mongo DB, ERC721, NFT

- Developed frontend using **React/Next.JS** and **Tailwind CSS**.
- Using **Express.JS** for backend.
- Developed **NFTs** marketplace smart contract based on **ERC721**.

Full Stack & Smart Contract Developer

Sep '19- Mar '20

DoubleDice.com

<https://doubledice.com/>

https://github.com/arthurchen330/DoubleDice_Platform

Tech-stack: React/Next.JS, GraphQL, Web3, NFT, Swap.SDK

- Developed frontend using **Next.js**, **TypeScript** and **GraphQL**.
- Developed main **Smart Contract** about betting system.
- Made NFT marketplace part for **DoubleDice** NFTs.
- **Mint** company's own token called "DODI".
- Added NFT trade logic using **SWAP SDK**.
- Gave some creative ideas to the managing team.

Full Stack & Blockchain Developer

Caladex.io

<https://github.com/arthurchen330/Caladex>

Tech-stack: React.JS, Express.JS, MongoDB, Blockchain, Solidity, ERC20

- Hired as a **PM**, lead the 7 members of developing team.
- **Lead** frontend developers to finish our project.
- Developed smart contracts with **Solidity** base on **ERC20**.
- Implemented Exchange logic with Smart Contracts.
- **Mint** company's own token called "CAX".
- Implemented **Air Drop** logic to produce liquidity in **Ethereum** Network.
- Use payment **third party API's** like PayPal and visa when users **withdraw** their money.
- Implemented **Staking** logic to attract customers and gain money.

Full Stack & Web3 Developer

Calahex.com

https://github.com/arthurchen330/Calahex_Frontend

Tech-stack: React.JS, Express.JS, MongoDB, Web3, Blockchain, Restful APIs

- Made **UI/UX** design for frontend.
- Developed frontend using **React.JS** and Material UI.
- Developed backend using **Express.JS** and **MongoDB** to store exchange log.
- Use **Web3** to communicate with smart contracts.
- Use payment **third party API's** like **PayPal** and **visa**.
- Implemented hybrid exchange platform using **ERC20** tokens.

Full Stack Developer

The Story Lab

Tech-stack: React/Next.JS, JavaScript/TypeScript, Express.JS, Firebase, Mongo DB

- Integrated **firebase** and email authentication logic into frontend.
- Customized **google map** into frontend to track story owners position and distributed users position.
- Designed frontend-test system and test cases.
- Developed **CI/CD** pipeline and test-cases for whole pages from scratch.

EDUCATION

Bachelor degree in Computer Science

University of Hong Kong

I majored Computer Science.

I specialized Computer Science, Computer Security, Web Technology and Account Management.

I have Bachelor degree in Computer Science in 2015.

Learning is my pleasure so I always trying to learn new skills.

HOBBIES

Painting

Reading

Playing Computer Games

HIGH LIGHTS

Test Driven Development

Revenue generation

Clean architecture

High quality code

Deadline focused work

Open-mind with new technologies and challenges

Sep '18- Aug '19
