kevin-christopher-ou 📄

I'm a senior software engineer with 8+ years of engine, full-stack develop experience and 5+ years of PM & CTO experience.

I'm a senior software engineer.

I am an organized, collaborative and highly skilled full stack developer with 8+ years of professional experience in dynamic and deadline-driven work environments.

Self-motivated and self-taught professional who likes to solve difficult problem, creative & open-mind.

I have been working as a engine, full-stack developer and PM & CTO.

Available for:

-PM & CTO

-Engine development

-Fullstack : web, mobile, desktop app development

## Skills:

Automation Engine

Blockchain

Artificial Intelligence

React

VR/AR

Vue

PHP

Python

Node.js

Go

.Net

Ruby

## Experience

### Roci Finance

Dec 2018 to Sep 2021

Lead developer United States

CryptoCurrency Lending Platform based on Score management system using NFT and Oracle

Github: <https://github.com/kevinchristopherou/LendingPlatform>

Tech-stack: Web (React.js / Typescript + Web3.js + Smart Contracts / Solidity / Hardhat + Oracle)

What I do:

As a lead developer, I designed the Roci FI lending platform architecture and smart contract architecture from scratch focused on security and optimization. I suggested to use Proxy and Storage logic for smart contract security improvement and integrated openzeppelin to smart contract for security logic myself. I also took part in smart contract development with contract developers for lending platform contract and developed NFT based User wallet score generate off-chain application using Oracle myself and integrate this into lending platform.

### PAO Ltd insuredao.fi

Jan 2019 to Aug 2021

Full stack developer Singapore

Blockchain Ecosystem Insurance Service Platform

Github: <https://github.com/kevinchristopherou/InsurancePlatform>

Tech-stack: Web (React.js / Typescript + Web3.js + Smart Contracts / Solidity / Hardhat)

What I do:

As a full stack developer. I developed AMM especially token convert part integrating Uniswap v3. And also upgraded the

...developed, developed a responsive, cross-device compatible smart contract app, used the market price calculation part using creative solution to improve solidity float number calculation correctness. And developed Python tracking application to track platform user's activity via twitter and etherscan APIs.

### Maxos LLC maxos.studio

Sep 2017 to Dec 2020

LaunchPool Staking Platform Boston, US

Accelerating investor engagement yield farming DApp

Tech-stack: Web (React.js / Redux-Saga + Web3.js + Smart Contracts / Solidity / Hardhat)

What I do:

As a lead developer, I planned the smart contracts structure with separated contracts and Escrow contracts for security and audit and developed mainly part in smart contracts using Hardhat environment in Solidity.

And integrate contracts into FE using Web3.js and Metamask connection into React.js based project.

### Kamermans Holding calahex.com

Apr 2016 to Dec 2020

CALAHEx Oranjestad, ARU

Decentralized Exchange Platform where companies registered in the Caribbean can list ERC-20 tokens

Tech-stack: Web-CeFI (React.js / Redux-Thunk + Laravel), Web-DeFI (React.js + Web3.js + Smart Contracts)

What I do:

As a PM, I have designed architecture & DB & UI/UX from scratch with my last experience above myself.

I have also suggested and implemented AI based financial solutions to avoid risk from high-changing price of cryptocurrency pairs.

And I have developed smart contracts for ERC-20 tokens exchange and management.

I recommended my team members (talented & well-experienced developers) on this project and lead them as a PM to archive completion of CALAHEx v1.0

### Vader Servicing LLC vader-dapp.vercel.app

Jul 2017 to Oct 2018

Engine developer & Problem solver Florida, US

Liquidity protocol that combines a collateralized stablecoin with liquidity pools

Tech-stack: Smart Contracts / Solidity / Hardhat

What I do:

As a smart contract developer, I developed Pools and Synth for ERC20 protocol smart contracts using Solidity on Hardhat.

And make testcase using Jest for smart contracts developed myself and others.

As a problem solver, I solved plenty of issues on security side and gas optimization on contract relationship and code quality.

### Africunia Bank excoincial.co

Jun 2015 to Feb 2016

Blockchain AFCASH Banking Platform London, UK

AFCASH Banking platform using cryptocurrencies and ERC-20 & TRC-20 tokens

Mobile(Android): <https://play.google.com/store/apps/details?id=com.africunia.afcashwallet&hl=en>

Tech-stack: Web (React.js + Ruby on Rails + Smart Contracts + Web3.js), Mobile (React Native)

What I do:

As a PM, I have upgraded entire ongoing banking platform v1.0 into v2.0.

New features of version 2.0 are integrate ERC-20 & TRC-20 tokens with smart contract using solidity into ongoing platform (only use BTC, BCH before) and upgrade frontend into Vue.js integrating smart contract using web3.js.

I provide solution to improve UI/UX design to let newly users can realize and use our platform much more easier by implement AI based high profit experienced client mirroring function.

And make trading UI much simpler than v1.0

**Nano Foundation** nano.org

Oct 2014 to Feb 2016

Node &amp; Server developer London, UK

Direct acyclic graphs (DAG) to settle transactions across the network

Tech-stack: Node / C++, Server / Rust

What I do:

As a Node developer, I developed transaction based network protocol and DAG ledger using C++.

And as a Server developer, I developed the backend for network server using Rust for user admin and transaction history, network security part.

**Designhubz** designhubz.com

Feb 2014 to Feb 2015

VR &amp; AR based eCommerce Website NewYork, US

AR &amp; 3D model product based eCommerce store

Tech-stack: Web (Wordpress + Three.js + Unity)

What I do:

As a lead developer, I developed VR based UI for each 3D products using Three.js with the function - zoom, move, rotates and make able to change 3D product color not only entire product but also partial color as clients want.

And also developed Unity engine for AR based 3D product management.

**Telmie** telmie.com

Nov 2013 to Dec 2014

Communication Platform London, UK

Marketplace and a telecommunications Platform that offers paid video chat and voice calls with experts in any field

Mobile(iPhone): <https://apps.apple.com/gb/app/telmie/id1345950689>

Tech-stack: Web (React.js / Next.js + Node.js + WebRTC + Zapier), Mobile (Flutter)

What I do:

As a lead developer, I have upgraded the video call speed and quality by integrating new WebRTC library and implement blockchain tech based chat function for safety and private chat.

And I make Zapier app to integrate telmie platform chat and booking system with gmail and google calendar automatically.

And upgraded the metronic theme based frontend into React.js/Next.js based frontend and speed up, optimize website.

**Dermoi** dermoi.com

Apr 2013 to Dec 2013

Face detection based Make-up &amp; Treatment Platform London, UK

Face feature detection based mark-up &amp; treatment website

Mobile(iPhone): <https://apps.apple.com/us/app/dermoi-therapist/id1400669843>

Tech-stack: Web (Vue.js / Nuxt.js + Django + Python / Tensorflow), Mobile (React Native)

What I do:

As a lead developer, I have developed face feature detection engine using Python Tensorflow integrate into platform so let clients can detect their face features automatically from their image and order with correct treatment and mark-up plan.

And I upgraded ongoing platform UI into Vue.js / Nuxt.js from normal bootstrap theme based UI.

**Nisheskin** nisheskin.wordpress.com

Jan 2013 to Dec 2013

Full stack developer London, UK

Website and Mobile application for monitoring the condition of the skin

Tech-stack: Web (Wordpress), Mobile (React Native + Python / OpenCV)

What I do:

As a full stack developer, I developed image processing engine using Python / OpenCV to detect skin condition from the image and calculate proper treatment method engine using Python.

And develop hybrid mobile application using React Native and make Advertisement website using Wordpress.

### ControlTrack controltrack.com.mx

May 2012 to Dec 2012

Vehicle Detection Platform Monterrey, MX

Control and track white & black listed person and people's feature, vehicle detect with LPR, Type, Speed

Tech-stack: Vue.js / Vuex + Golang + Python / Tensorflow - Yolo

What I do:

As a lead developer, I developed python engine to detect the vehicles from live camera as live streaming and counting, detecting type, calculating speed, summarizing script and integrated this into Golang based backend server.

And upgraded the normal HTML/JS/CSS based website into Vue.js based frontend and speed up, optimized the website.

## Education

### Singapore University of Technology and Design

May 2009 to May 2013

Bachelor's science, Computer Science & Engineering

## Projects

### LendingPlatform

 [github.com/kevinchristopherou/LendingPlatform](https://github.com/kevinchristopherou/LendingPlatform)

JavaScript, Solidity

### InsurancePlatform

 [github.com/kevinchristopherou/InsurancePlatform](https://github.com/kevinchristopherou/InsurancePlatform)

HTML, Solidity, CSS, Python, JavaScript

### LaunchPoolPlatform

 [github.com/kevinchristopherou/LaunchPoolPlatform](https://github.com/kevinchristopherou/LaunchPoolPlatform)

JavaScript, HTML, CSS, Solidity

### CoinExchangePlatform

 [github.com/kevinchristopherou/CoinExchangePlatform](https://github.com/kevinchristopherou/CoinExchangePlatform)

CoinExchangePlatform

SCSS, Dockerfile, Ruby, JavaScript, CSS, HTML, Shell, CoffeeScript, TypeScript

### Vader\_Protocol\_Solidity
