Experience

Dec 2018 → Sep 2021 **Lead developer** – Roci Finance
reactjs, typescript, web3js, smartcontracts, solidity, hardhat, oracle, ipfs

CryptoCurrency Lending Platform based on Score management system using NFT and Oracle Github: <https://github.com/kevinchristopherou/LendingPlatform> What I do: As a lead developer, I designed the Roci FI lending platform architecture and smart contract architecture from scratch focused on security and optimization. I suggested to use Proxy and Storage logic for smart contract security improvement and integrated openzeppelin to smart contract for security logic myself. I also took part in smart contract development with contract developers for lending platform contract and developed NFT based User wallet score generate off-chain application using Oracle myself and integrate this into lending platform.

Jan 2019 → Aug 2021 **Full stack developer** – PAO Ltd
reactjs, typescript, web3js, smartcontracts, solidity, hardhat

Blockchain Ecosystem Insurance Service Platform Github: <https://github.com/kevinchristopherou/InsurancePlatform> What I do: As a full stack developer, I developed AMM especially token convert part integrating Uniswap v3. And also upgraded the market price calculation part using creative solution to improve solidity float number calculation correctness. And developed Python tracking application to track platform user's activity via twitter and etherscan APIs.

Sep 2017 → Dec 2020 **Lead developer** – Maxos LLC
reactjs, redux-saga, web3js, smartcontracts, solidity, hardhat

Accelerating investor engagement yield farming DApp Github: <https://github.com/kevinchristopherou/CoinExchangePlatform> What I do: As a lead developer, I planned the smart contracts structure with separated contracts and Escrow contracts for security and audit and developed mainly part in smart contracts using Hardhat environment in Solidity. And integrate contracts into FE using Web3.js and Metamask connection into React.js based project.

Apr 2016 → Dec 2020 **Project manager** – Kamermans Holding
reactjs, redux-thunk, laravel, web3js, smartcontracts, solidity, hardhat, erc20

Decentralized Exchange Platform where companies registered in the Caribbean can list ERC-20 tokens. What I do: As a PM, I have designed architecture & DB & UI/UX from scratch with my last experience above myself. I have also suggested and implemented AI based financial solutions to avoid risk from high-changing price of cryptocurrency pairs. And I have developed smart contracts for ERC-20 tokens exchange and management. I recommended my team members (talented & well-experienced developers) on this project and lead them as a PM to archive completion of CALAHX v1.0

Jul 2017 → Oct 2018 **Engine developer & Problem solver** – Vader Servicing LLC
smartcontracts, solidity, hardhat, erc20

Liquidity protocol that combines a collateralized stablecoin with liquidity pools
Github: https://github.com/kevinchristopherou/Vader_Protocol_Solidity What I do: As a smart contract developer, I developed Pools and Synth for ERC20 protocol smart contracts using Solidity on Hardhat. And make testcase using Jest for smart contracts developed myself and others. As a problem solver, I solved plenty of issues on security side and gas optimization on contract relationship and code quality.

Jun 2015 → Feb 2016 **Project manager** – Africunia Bank
reactjs, ruby-on-rails, smartcontracts, web3js, solidity, hardhat, erc20, react-native

AFCASH Banking platform using cryptocurrencies and ERC-20 & TRC-20 tokens Web: <https://www.excoincial.co> Mobile(Android): <https://play.google.com/store/apps/details?id=com.africunia.afcashwallet&hl=en> Github: <https://github.com/kevinchristopherou/CoinExchangePlatform> What I do: As a PM, I have upgraded entire ongoing banking platform v1.0 into v2.0. New features of version 2.0 are integrate ERC-20 & TRC-20 tokens with smart contract using solidity into ongoing platform (only use BTC, BCH before) and upgrade frontend into Vue.js integrating smart contract using web3.js. I provide solution to improve UI/UX design to let newly users can realize and use our platform much more easier by implement AI based high profit experienced client mirroring function. And make trading UI much simpler than v1.0

Oct 2014 → Feb 2016 **Node & Server developer** – [Nano Foundation](#)
c++, rust

Direct acyclic graphs (DAG) to settle transactions across the network Github:
https://github.com/kevinchristopherou/Nano_cryptocurrency_network What I do: As a Node developer, I developed transaction based network protocol and DAG ledger using C++. And as a Server developer, I developed the backend for network server using Rust for user admin and transaction history, network security part.

Feb 2014 → Feb 2015 **Lead developer** – [Designhubz](#)
wordpress, pythreejs, unity3d, augmented-reality, e-commerce

AR & 3D model product based eCommerce store What I do: As a lead developer, I developed VR based UI for each 3D products using Three.js with the function - zoom, move, rotates and make able to change 3D product color not only entire product but also partial color as clients want. And also developed Unity engine for AR based 3D product management.

Sep 2013 → Dec 2014 **Lead developer** – [Telmie](#)
reactjs, next.js, node.js, webrtc, zapier, flutter, dart

Marketplace and a telecommunications Platform that offers paid video chat and voice calls with experts in any field Web: <https://telmie.com> Mobile(iPhone): <https://apps.apple.com/gb/app/telmie/id1345950689> What I do: As a lead developer, I have upgraded the video call speed and quality by integrating new WebRTC library and implement blockchain tech based chat function for safety and private chat. And I make Zapier app to integrate telmie platform chat and booking system with gmail and google calendar automatically. And upgraded the metronic theme based frontend into React.js/Next.js based frontend and speed up, optimize website.

Apr 2013 → Dec 2013 **Lead developer** – [Dermoi](#)
vue.js, nuxt.js, django, python, tensorflow, image-processing

Face feature detection based mark-up & treatment website Web: <https://dermoi.com> Mobile(iPhone): <https://apps.apple.com/us/app/dermoi-therapist/id1400669843> What I do: As a lead developer, I have developed face feature detection engine using Python Tensorflow integrate into platform so let clients can detect their face features automatically from their image and order with correct treatment and mark-up plan. And I upgraded ongoing platform UI into Vue.js / Nuxt.js from normal bootstrap theme based UI.

Jan 2013 → Dec 2013 **Full-stack developer** – [Nisheskin](#)
wordpress, react-native, python, opencv

Website and Mobile application for monitoring the condition of the skin Web: <https://nisheskin.wordpress.com> Mobile: <https://play.google.com/store/apps/details?id=nishe.skin.tracker> <https://apkpure.com/developer/Matej%C5%BD> Github: <https://github.com/kevinchristopherou/NisheSkin-React-Native-Image-Processing> What I do: As a full stack developer, I developed image processing engine using Python / OpenCV to detect skin condition from the image and calculate proper treatment method engine using Python. And develop hybrid mobile application using React Native and make Advertisement website using Wordpress.

May 2012 → Dec 2012 **Full-stack developer** – [ControlTrack](#)
vue.js, vuex, go, python, tensorflow, yolo

Control and track white & black listed person and people's feature, vehicle detect with LPR, Type, Speed Github: https://github.com/kevinchristopherou/Detect_Vehicle_type_and_counting_with_livecam_Python What I do: As a full stack developer, I developed python engine to detect the vehicles from live camera as live streaming and counting, detecting type, calculating speed, summarizing script and integrated this into Golang based backend server. And upgraded the normal HTML/JS/CSS based website into Vue.js based frontend and speed up, optimized the website.

Education

2009 → 2013 **Bachelor's degree in computer science** – Singapore University of Technology and Design
artificial-intelligence, image-processing, machine-learning, deep-learning, python

I took part in ACM competition (Asia semi-final) and received bronze medal.
