Web: <https://app.xwg.games/>

Tech-stack: React.js + Redux + Material UI + Socket.io

What I do:

- Navbar component with high structure.
- Dropdown Menu of Navbar animation Effect using CSS3.
- DreamCard Number Animation Effect of Dashboard Page.
- Loading Component using Gradient Text Animation Effect Using CSS3.
- Volume & Transactions Graph of Analytics Page using react-apexchart library.
- Multi-Language platform using React createContext, useContext Hook.
- INPUT UI common components(Button, TextField, List ...)
- Pool Page UI, Game Page UI, Fusion Page.

- NFT smart contract interaction using Web3.js
- Binance Block chain connection flow and UI using web3.js and ethers.js
- Real-time Chat using React hook, express and socket.io in Fusion page.
- Redux action functions for interacting with Express.js Backend using axios library.
- React Auth Routing using @okta/okta-react library.
- Frontend Testcase using Enzyme.
- Project Hosting using DigitalOcean.

I have a Bachelor degree in computer science.

Working with a startup company which has creative ideas as a remote worker and contributes to achieve success with all my effort has been my happiness until now.

I think communication and co-operative work with perfect team spirit is key for project success.

I can work in your time zone as a full time and I am just ready to start work now.

I hope you consider my profile website and past experiences carefully and give me a chance to take part in your great idea implementation.

Could you contact me via chat and discuss in detail about this job?

Regards.
