Web: <https://brandscopic.com/>

Tech-stack: Ruby on Rails + Laravel + MySQL + Vue.js

What I do:

- Moved from using Rails controllers to build more scalable/isolated RESTful APIs using Grape and Sidekiq.
- While this allowed the application to be more scalable, spent time on reliability by adding many
- Integration/unit tests for the new API.
- Developed and maintained the front-end functionality of websites.
- Participated in discussions with clients to clarify what they wanted.
- Designed prototypes for websites.
- Wrote cross-browser compliant XHTML, CSS, JavaScript, and CoffeeScript.
- Managed simultaneously several databases and reporting tools.
- Provided guidance to other team members on web development issues.
- Developed websites that have a consistent feel and look throughout all web properties.
- Provided technical support to end-users.
- Identified and corrected software deficiencies.

I have a Bachelor degree in computer science.

Working with a startup company which has creative ideas as a remote worker and contributes to achieve success with all my effort has been my happiness until now.

I think communication and co-operative work with perfect team spirit is key for project success.

I can work in your time zone as a full time and I am just ready to start work now.

I hope you consider my profile website and past experiences carefully and give me a chance to take part in your great idea implementation.

Could you contact me via chat and discuss in detail about this job?

Regards.
