Beier Irving

Senior Game Developer

Adept at developing video games, performing various project management tasks, and conducting code reviews. Strong knowledge holders of game engineering concepts such as server/client architectures, scalability, connectivity, algorithm analysis, asset and data. Offers well-developed analytical skills and important ability to remain calm in stressful situations. 5+ years of Unity experience on multiple mobile platforms. Drive to succeed, passion for what I am creating, respect for clients, focus on continuous improvement, and a willingness to thrive in an environment built around trust, honesty. These are my core values!

WORK EXPERIENCE

Block Auto Gaming NCISOFT

03/2010 - 04/2014

Achievements/Tasks

- While carrying out the basic business of game operation, I joined the automatic hunting (aka auto) prevention team, which was a headache in game operation at the time.
- In the team, I conducted an auto program detection and repulsion project using process inspection of rootkit idea and pattern inspection.

Betting Game Development Workplace/Company

05/2015 - 12/2019

Achievements/Tasks

- From 2015 to 2019, I conducted business in Chinese betting game development companies such as slot machines, casinos, poker, powerball, and lottery that provide services in China, Thailand, Vietnam, and Mongolia.
- In this period, I have been worked in the gambling game development and service industry, leading a development team of 5-7 developer and conducted the business as a team leader. In addition, while actually servicing the game developed by our team, communication with users was also conducted smoothly, increasing customer satisfaction.

Associate Certified Game Programmer (06/2019 - Present)
Unity

PERSONAL PROJECTS

Betting Game (05/2015 - 11/2019)

- Wrote and developed application specific code based on design requirements as well as implemented new game features or functionality under the direction of programming leads
- Worked with lead engineers and designers for designing, developing, and maintaining a suite of internal tools, templates and related systems to provide assistance with rapid and efficient game development process
- Assisted in documenting technical specifications for gameplay systems and gaming codes for future references as well as in debugging and optimizing existing game applications as required
- Collaborated with game designers, producers, developers and artists to ensure highest quality product as well as assisted in play testing
- Optimized server programme to increase the number of simultaneous subscribers.
- For server administrators, we developed a server administrator program with a familiar UI using Net.core.

Driving School 2017 (09/2015 - 10/2016)

- Developed schedules and determined milestones for gaming projects as well as ensured team followed current architecture and operating environment while solving complex technical problems during game production
- Maintained project specific documentation for technical team as well as worked with designers, developers and senior programmers to create and modify game features and
- Wrote and developed application specific code based on design requirements as well as implemented new game features or functionality under the direction of programming leads

Indie Wrestler (10/2021 - Present)

- Performing testing and debugging of game applications to identify and fix program issues as well as working with development team in making improvements such as updating, develop add-ons, expansion packs or new levels
- Keeping up-to-date knowledge of latest advancements in gaming industry as well as contributing innovative ideas towards various aspects of game application design and development
- Designed, maintained, and executed well-documented and extensible programs for high-quality and efficient game applications in compliance with established coding standards and best practices
- Collaborating with the technical team to design compelling and new game features or elements such as animation sequences, interfaces, effects, and mechanics

EDUCATION

• **M.S. Computer Science | Specialisation in Game Development**

University of Southern California

06/2013 - 05/2015

Los Angeles, CA

Courses

- Core Computer Science | Core Game Development | Game Development Infrastructure

• **B.S. in Computer Science** University of Southern California

01/2009 - 03/2013

Los Angeles, CA

Courses

- Game Production | Visual Design For Games and Interactive | Computer Animation | Video Game Programming Game Hardware Architectures | Game Engine Programming | Serious Game Development Introductory and Intermediate Game Design
