

Abdoul Diop

Senior Full-stack Engineer

ALEXANDRIA, VA, UNITED STATES

+17247690810

abdouldiop241@gmail.com

<https://www.linkedin.com/in/abdoul-diop/>

Summary

- Enthusiastic Full-stack Developer with 13+years of professional experience in Efficient Application Design, development and maintenance.
- Experience in all phases of Software Development Life Cycle (SDLC) from Requirements gathering, Analysis, and Design, Development, Documentation, Testing, Implementation and Maintenance of various Web and windows applications in Waterfall and Agile Methodology.
- Experience in developing web and desktop applications using client server architecture with C#, ASP.NET, ADO.Net, Web Forms, Web Services, Silverlight 5, WPF, LINQ, WCF, MVC5, AJAX, Entity Framework, KnockoutJs, AngularJS, Kendo UI.
- Worked with software/tools, TFS, VSS, Clear Case, Visual Studio (2017, 2015) Fire bug, Visio, Fiddler. , SQL Profiler, Resharper, Developer Tools,
- Proficient in Object Oriented Programming (OOPS) concepts and design patterns.Good understanding and experience working on ASP.NET core.
- Experience in advanced JavaScript/UI frameworks like Angular 4, Bootstrap and JQuery.
- Experience in MEAN (MongoDB, Express, Angular 2 and NodeJS) Stack application development.
- Good experience in ASP.NET server controls and AJAX controls such as Script Manager, Update Panel and Modal Popup Extender.
- Experience working on N-Tier Architectures such as MVC (Model View Controller), MVVM (Model View, View Model), Prism in applications Strong Understanding of Data structures, Algorithms, Object-Oriented Design, Design patterns like singleton, factory, MVC, MVVM.
- Hands-on experience using one-way/two-way data-binding, filters, UI-routers and creating custom directives in Angular 2.
- Experience and good understanding in developing (SOA) Service Oriented Architecture, Web Services, SOAP, WSDL, UDDI and DOM.
- Experience working with XML, XSLT, XQUERY, and XPATH and worked with libraries.
- Experience in handling databases like MySQL and NoSQL databases like MongoDB.
- Worked with IIS and .NET Assemblies during application deployment and experience in using XML Serialization.
- Experience in RDBMS Concepts, Database Management Systems, Database Physical and Logical design, Data Mapping, Table normalization, Data Modelling.
- Team Player with Focused/Committed / Get-the-Job-Done Attitude, highly organized and able to work independently.

Skills

Internet Technologies: Microsoft .NET Framework, ASP.NET MVC 3.5/4/5, MVVM, ASP.NET Web forms, AJAX, ASP, ASP.NET CORE, Micro Services, JQUERY, IIS Web Server, WPF, WCF Services, XML Web Services, SharePoint, NHibernate, Control M

Programming Languages: C, C#, Java, Node.js, Ruby, Python, SQL, T-SQL, PL/SQL and VB 6.0

Distributed Technologies: Restful, Web API, WCF and SOAP

Databases: MS Access, MS SQL Server, POSTGRESQL, Cassandra, NO-SQL, Mongo DB, Redis, AWS RDS, DynamoDB, GCP, Oracle

Database Access Technologies: Entity Framework, LINQ, LINQ to objects, ADO.NET

UI Technologies: HTML5, Bootstrap 3.0, CSS3, XML, JavaScript, Angular 1.3/1.4/1.5/1.6/2.0/4.0, React JS, REDUX, Vue.js, Javascript/Typescript, Tailwind CSS, Material UI, Ant Design, JQuery, KnockoutJs, Node.Js, KendoUI, VBScript, ASP, PHP

IDE: Visual Studio 2015/2013/2012/2010/2008.

Design Tools and Languages: UML, Visio 2000 for enterprise architects and Rational rose

Reporting Tools: Crystal Reports, SSIS, SSRS, Tableau, Qlikview, Telerik Reporting

Version control and installation tools: Git, GitLab, Github, Bitbucket, Visual source Safe, Tortoise SVN, MS Team foundation server

Other: MS Application Block 4.0, Agile, Docker, Kubernetes, Bamboo, Jenkins, Jira, ArgoCD, Swagger, OpenAPI, Postman, SiteCore

Operating Systems: Windows 11/10/8/7/2000/XP/NT/98/95, UNIX, Ubuntu, Linux, Mac
Testing Tools: N-Unit, Junit, Mockito, Jasmine, Cucumber, Selenium, Jest, Cypress, TDD, DDD

Experience

March 2018 - PRESENT

Koubrah, Washington DC, USA - C# .Net Developer/Angular Developer

Responsibilities:

- Developed and assisted in migration of web application to Angular 4 Application. I took the responsibility of Architecture of the stand alone module for the complete migration of the module.
- Created twelve single-page, secure responsive web application to replace a legacy line-of-business web application.

- Developed various services in angular that consume rest services from the backend written in .NET. Also Utilized reusable components and guards to better accommodate the complete web application.
- Leveraged Angular resources for all data access, encapsulating URLs and standardizing data access interfaces. Created custom directives for re-usable components (multi-filed form elements, background file uploads, etc.)
- Performed code review, worked close to team members to ensure consistence to code standards.
- Implemented Angular Service calls using Angular Factory.
- Prototype concept using ASP.NET core and EF7 model first to replace current Access apps.
- Design and develop Web Applications using ASP.NET MVC 5 and C# that are used by internal users.
- Performed validations on Web Forms using .NET Validation Controls and Client Side Validation using Angular4.
- Implemented the service using Node.JS, React.JS for performance, development, maintenance and deployment reasons.
- Used Azure BLOB to access required files and Azure Storage Queues to communicate between related processes.
- Made changes as required in the existing SQL functions, stored procedures and packages and refined the new data model.
- Using ADO.NET Entity Data Model in retrieving data using LINQ to SQL and LINQ to Objects with ASP.NET.
- Used Generics, Lambda Expressions, Extension Methods, Linq to Sql, Linq to Objects.
- Developed MVC Razor views, partial views, layout pages, complex Controllers, helper methods, View Models.
- Modified Web Services to interact with the other applications and exposed them using SOAP and HTTP.
- Developed Android and IOS Application using C# with XAMARIN.
- Used XAMARIN Insights for finding and debugging issues in the application.
- Implemented Testing using Karma, Jasmine, Protractor, and NUNIT.
- Performed multithreading programming to improve the application performance.
- Created reports using SQL Reporting Services (SSRS) for customized and ad-hoc Queries.
- Loading data from various sources like OLEDB, flat files to SQL Server database, using SSIS Packages and created data mappings to load the data from source to destination.
- Used Sub Version Control (SVN) for repository/Code version Management.
- Using Team Foundation Server as a source control.

Environment: ASP.NET, C#, MVC5, React.js, Windows azure cloud, VB.NET, WCF, WPF, Web API, .Net Framework 4.5, NUnit, HTML, HTML5, CSS3, AJAX, CSS, AngularJS1.4, SQL Server 2012, MS Access Database, AWS, Oracle, Kendo UI, ADO.NET, ASP.NET MVC5, Entity Framework, Visual studio 2013, JavaScript, Sitefinity, Driver for Empower Reports, Telerik, JQuery, N SERVICE BUS, Azure, MVVM, SSIS, SSRS, MS SQL Server, TFS 2013, Autosys and JIL files, UNIX.

June 2015 – February 2018

KickFin, Austin, TX, USA – Sr.Net Developer

Responsibilities:

- Involved in all the phases of Software Development Life Cycle (SDLC) including Requirements gathering, Designing, Programming, Testing and Documentation of various projects.
- Used AGILE SCRUM methodology to deliver in sprints and Status Meetings, Code Review Meetings.
- Designed AngularJS Modules and Controllers using different directives like ngShow, ngRepeat, ngApp, ngController and many more.
- Established communication from AngularJS Project to Web API Project.
- Developed web application using ASP.NET MVC 5 (Model-View Controller) and AngularJS 1.5.
- Implemented Security, Routing, bundle configuration, Action Selectors, Action Filter, and Caching in MVC controllers for application development.
- Coded AngularJS controllers and directives for application functionality and filters for heavy DOM manipulation.
- Responsible for development, execution, tracking and results reporting of manual test cases for assigned projects/features using VSTS 2010/TFS Test Manager.
- Worked with database design, writing stored procedures and queries using LINQ.
- Maintained readable documentation for all the modules that I developed and gave Knowledge transitions to new joiners in the team.
- Worked with ASP.NET Web Forms, Web Services, and State Management, Caching features, Configuring optimizations and securing the web application.
- Used AJAX to retrieve the data from database asynchronously.
- Used C# in Xamarin to create native mobile application.
- Performance tuning of SQL queries, procedures using SQL Profiler and Index Tuning Wizard.
- Created ETL packages in SQL Integration services (SSIS) for various data loads and extracts from different types of sources
- like SQL Server, Text, CSV flat files, Excel.
- Generated several drills down and drill through reports using SSRS.
- Involved in designing, developing, debugging and testing of reports in SQL Server Reporting Services (SSRS).
- Created simple and parameterized reports and also complex reports involving Sub Reports, Matrix/Tabular Reports, Charts and Graphs using SSRS in Business intelligence development studio (BIDS).

Environment: AngularJS, Web API, .Net Framework 4.5, IIS 7.5, ASP.NET C#, Entity Framework, Bootstrap, Visual Studio 2015, Mongo DB, SSIS, SQL Server 2012, HTML, CSS, VB.NET, WCF, ADO.NET, MVC, JQUERY, KnockoutJs, NUnit, SQL Server Management Studio.

August 2012 – May 2015

HawkSearch, Rosemont, IL, USA – MVC.Net Developer

- Involved in interacting with business analysts to understand the business flow and gathered business requirements.
- Prepared Technical design document for several phases of the application.
- Utilized Agile methodology, practicing TDD using internal process SCRUM for the application development.
- Developed the application using .Net Framework 4.5 and Visual Studio 2013.
- Developing new and maintaining scalable, high-performance user facing applications using Ember.js with a modern web- stack (HTML5, CSS3, bootstrap).
- Created knockoutjs widget subsystem within a .NET jdash dashboard using typescript and inheritance. Widgets needed to react to page controls changing to refresh data and browser resizing to change styling for responsiveness.
- Used ADO.Net objects like Data Reader, Data Adapter, Data Set, Transaction and SQL Command for connecting, retrieving and modifying data in database.
- Used LINQ to SQL commands in Data Access Layer to retrieve, update and store data in database.
- Developed the UI using WinForms in VB.NET.
- Used Windows Presentation Foundation (WPF) for data validation.
- Created WCF services. Configured endpoints and implemented the contracts to use the WCF service.
- Involved in writing Stored Procedures, Triggers, Views and T-SQL statements in SQL Server for the backend development.
- Implemented most of the ANSI SQL specification for INSERT, UPDATE, DELETE and SELECT statements.
- Used Microsoft Azure active directory to provide access to cloud based application.
- Created WCF services for data exchange between clients and server. Implemented Fault Contract and Data contract for WCF service.
- Involved in designing, developing and testing of the strategy to populate the insurance data from various source systems feeds using SSIS.
- Created SSIS packages to import and export data from MS Excel SQL Server and vice versa.
- Designed and deployed several SSRS reports such as Drill down reports, Drill through reports, Parameterized reports, Cascaded reports, Cached reports, Snapshot Reports, linked reports, Sub reports.
- Involved in bug fixes and production support.
- Assisted in test automation tool analysis and prototyping.
- Performed Unit Testing to identify and resolve functional issues.
- Performed unit testing using NUnit.

Environment: React, Visual Studio 2013, .Net Framework 4.5, SQL Server 2012, C#, ASP.Net MVC, SSIS, Crystal Reports, SSRS, HTML, CSS3, JQuery, Bootstrap, Kendo UI, AJAX, JavaScript, WPF, WCF, TFS, IIS 7.0.

September 2011 — August 2012

Clay, San Francisco, CA, USA – *UI Developer*

- Maintained the Web UI compatibility in all major Browsers (IE7 and above, Firefox and chrome).
- Used VB.NET and SQL to design and develop various abstract classes, interfaces, classes to construct the business logic.
- Extensively used Object Oriented Programming (OOP) and Design Patterns.
- Responsible for developing the Logic using C#.NET.
- Used AJAX extensively with JavaScript and XML.
- Retrieved and displayed the data in the required format using data sets and data grid.
- Used client side technologies like HTML, CSS and JavaScript for designing pages and validations as per business requirements.
- Developed Data Access Layer in VB.NET to do the entire database related operations and used ADO.NET objects to connect the database and access data.
- Used Team Foundation server (TFS) to manage changes to the source code.
- Worked on deploying the application on to development, staging and production servers.
- Maintained version control through Visual Source Safe (VSS).
- Did performance testing using VSTS 2010.

Environment: Visual Studio 2010, ASP.NET, C#, SQL Server 2005, Web Services, ADO.NET, AJAX, JavaScript, HTML, DHTML, XML, XSLT, Crystal Reports, SOAP, TFS, VSTS 2010.

Education

September 2007 - August 2011

Texas State University – *Bachelor's in Computer Science*
