PROFESSIONAL SUMMARY

Senior Frontend Engineer with over 7 years of experience specializing in building high-scale applications across the **React**, **Angular**, and **React Native** ecosystems. Proven track record of architecting modern web solutions using **Next.js** and **TypeScript**, while leveraging **AWS**, **Docker**, and **Supabase** to bridge the gap between frontend and infrastructure. Expert in optimizing Core Web Vitals and leading full-cycle product delivery from initial discovery to **Kubernetes**-based deployment.

EXPERIENCE

Front-end Engineer, *Amazon*

06/2024 – Present
Arlington, Virginia, US

- Engineered and deployed scalable frontend architectures on **AWS** using **S3**, **CloudFront**, and **Route 53** for global content delivery.
- Developed and maintained high-performance **Next.js 14/15** applications utilizing **App Router**, **Server Actions**, and **Edge Runtime**.
- Containerized frontend environments and microservices using **Docker**, ensuring consistency across local development and production.
- Orchestrated seamless application deployments and scaling within **Kubernetes (EKS)** environments, managing **Helm** charts and resource limits.
- Implemented real-time data synchronization and user authentication using **Supabase** (PostgreSQL/GoTrue) for rapid feature prototyping.
- Architected serverless backend logic using **AWS Lambda** and **API Gateway** to reduce infrastructure overhead and costs.
- Leveraged **Firebase Cloud Functions** and **Firestore** to build reactive, event-driven features for real-time collaboration.
- Integrated **Terraform (IaC)** to automate the provisioning of frontend hosting environments and **CI/CD** pipelines.
- Built and optimized internal tools using **Angular 18**, taking advantage of the new **Signals**-based reactivity model and **Zoneless** applications.
- Enhanced application observability by integrating **AWS CloudWatch** and **Sentry** for real-time error tracking and performance monitoring.
- Developed secure, multi-tenant architectures utilizing **Auth0** and **AWS Cognito** for enterprise-grade Identity Access Management (IAM).
- Streamlined local development workflows by implementing **Turborepo** for monorepo management across multiple React and Angular packages.
- Led the transition from REST to **trRPC** and **GraphQL** to ensure end-to-end type safety between the frontend and the database.

Senior React/Angular Developer, *Johnson & Johnson*

10/2022 – 05/2024
New Brunswick, New Jersey, US

- Architected scalable micro-frontend architectures using **Module Federation** to decouple large-scale **React** and **Angular** applications.
- Spearheaded the migration of complex enterprise systems to **Next.js**, leveraging **Server-Side Rendering (SSR)** and **Static Site Generation (SSG)** for optimal SEO and performance.
- Directed the development of a unified **Design System** using **Storybook**, ensuring UI consistency across multiple product lines and frameworks.

- Optimized large-scale state management strategies by implementing **Zustand** for React and advanced **Signals** in **Angular 16/17**.
- Engineered high-performance data visualizations and complex dashboards using **D3.js** and **Highcharts** integrated within **React** workflows.
- Enforced strict **TypeScript** patterns and advanced utility types to reduce runtime errors and enhance developer experience (DX).
- Refined **CI/CD pipelines** using **GitHub Actions** and **Vercel**, reducing deployment lead times and automating automated regression testing.
- Mentored junior and mid-level developers through rigorous **Code Reviews**, pair programming, and internal technical workshops.
- Implemented robust security protocols, including **OAuth2/OpenID Connect** and **JWT** authentication, to secure sensitive user data.
- Improved application Core Web Vitals by auditing bundles with **Webpack Bundle Analyzer** and implementing **Tree Shaking** and **Image Optimization**.
- Facilitated the integration of **Headless CMS** solutions (like Contentful or Strapi) to empower non-technical stakeholders with content control.
- Led technical discovery and feasibility studies for new features, bridging the gap between **Product Management** and engineering execution.

Frontend Developer, United Airlines

03/2020 – 09/2022

Chicago, Illinois, US

- Architected and delivered cross-platform mobile applications using **React Native**, ensuring high performance on both **iOS** and **Android**.
- Developed enterprise-level web applications using **Angular 10+**, leveraging **TypeScript**, **RxJS**, and **Observables** for reactive data streams.
- Migrated legacy class-based architectures to **React Functional Components** using **Hooks** to improve maintainability and dev-velocity.
- Managed global state across diverse projects using **NgRx** for Angular and **Redux Toolkit** for React ecosystems.
- Designed and implemented modular, shared **UI Component Libraries** compatible with both web and mobile platforms.
- Integrated native device features like **Push Notifications**, **Biometrics**, and **Geolocation** within **React Native** environments.
- Optimized frontend performance by implementing **Change Detection** strategies in Angular and **Memoization** in React.
- Consumed complex **GraphQL** and **REST APIs**, handling real-time data synchronization with **Apollo Client**.
- Automated testing suites using **Jest**, **Enzyme**, and **Cypress** to ensure robust code quality across frameworks.
- Streamlined deployment pipelines using **Fastlane** for mobile app store submissions and **CI/CD** for web hosting.

Junior React Developer, Berkshire Hathaway

09/2018 – 02/2020

Omaha, Nebraska, US

- Developed and maintained responsive web applications using **React 16.8+** and **Functional Components**.
- Managed complex application state transitions using **Redux**, **Thunks**, and the **Context API**.
- Leveraged **React Hooks** (`useState`, `useEffect`, `useMemo`) to enhance code reusability and component logic.
- Integrated **RESTful APIs** using **Axios** for seamless data fetching and asynchronous state management.
- Collaborated on UI/UX designs to build modular, reusable **Styled Components** and **Material-UI** layouts.
- Optimized application performance through **Code Splitting**, **Lazy Loading**, and **Virtualization** techniques.

- Ensured cross-browser compatibility and mobile-first responsiveness using **CSS Modules** and **Flexbox/Grid**.
- Participated in **Agile/Scrum** workflows, utilizing **Git** for version control and performing thorough **Code Reviews**.

EDUCATION

Bachelor's Degree in Computer Science, *University of Florida*

2014 – 2018

Florida, US

- Introduction to Computer Science
- Data Structures and Algorithms
- Programming Fundamentals
- Computer Organization and Architecture
- Operating Systems
- Database Systems
- Software Engineering
- Artificial Intelligence
- Computer Networks
- Web Programming

Skills

Core Frameworks & Libraries

- **React:** Next.js (App Router), React Native, Redux Toolkit, Hooks, Context API, Zustand.
- **Angular:** Angular 10–18, RxJS, Observables, NgRx, Signals, TypeScript.
- **UI/Styling:** Tailwind CSS, Material-UI, Styled Components, Storybook, CSS Modules.

Backend & Cloud Infrastructure

- **Cloud (AWS):** S3, CloudFront, Lambda, Route 53, API Gateway, Cognito.
- **BaaS:** Supabase (PostgreSQL), Firebase (Firestore, Cloud Functions), Auth0.
- **DevOps:** Docker, Kubernetes (EKS), Terraform (IaC), GitHub Actions, CI/CD.

Data & Integration

- **APIs:** RESTful APIs, GraphQL (Apollo), tRPC, Axios, WebSocket.
- **Testing:** Jest, Cypress, Enzyme, React Testing Library.

Tools & Workflow

- **Tools:** Git, Webpack, Vite, Turborepo, Postman, Figma.
- **Methods:** Agile/Scrum, Micro-frontends, Server-Side Rendering (SSR), Mobile-First Design.
