
Jerry Oneal Butler

Senior front end engineer (React, Vue, Node, AWS)

Chicago Illinois

+1 318 202 8811 | jerrybutler0226@gmail.com

PROFESSIONAL SUMMARY

Strategic and innovative **Front-End Architect** with over 10 years of experience leading the design and development of high-performance, scalable web applications. Expert in modern JavaScript frameworks and libraries including **React**, **Vue.js**, and **Angular**, with deep proficiency in **TypeScript**, modular architecture, and component-driven design.

Specialized in building enterprise-grade UIs that are accessible, performant, and maintainable, leveraging **SSRs (Next.js, Nuxt.js)**, **GraphQL**, and **RESTful APIs** for seamless integration. Adept at optimizing front-end performance through **lazy loading**, **code splitting**, and **Web Vitals** monitoring.

Proven success in guiding engineering teams, establishing coding standards, performing code reviews, and aligning front-end strategies with business goals in **Agile/Scrum** environments. Experienced in architecting frontend ecosystems integrated with **CI/CD pipelines**, **Docker**, **Kubernetes**, and **AWS CloudFront/S3** deployments. Passionate about elevating user experience, driving UI innovation, and mentoring engineers in adopting modern technologies and best practices. Skilled at bridging UX, DevOps, and backend coordination to deliver robust, maintainable solutions at scale.

TECHNICAL SKILLS

Main Skills: Expert in **JavaScript**, **TypeScript**, **HTML5**, **CSS3**, **SCSS**, **JQuery**, **ES6/ES7**, with advanced knowledge of **Webpack**, **Babel**, and **ESLint** for building modern, maintainable front-end applications.

Frontend Frameworks: Advanced proficiency in **React.js**, **React Native**, **Next.js**, **Remix**, **Angular**, **Vue.js**, and **Nuxt.js** for creating high-performance **SPAs** and **SSR** applications with responsive and intuitive user interfaces.

State Management: Proficient in **Redux**, **Context API**, **MobX**, **Vuex**, and **Pinia**, enabling robust and scalable application state architecture.

Component Libraries: Skilled in integrating and customizing UI libraries such as **Material-UI (MUI)**, **Ant Design**, **Chakra UI**, and **Bootstrap** to build clean, responsive, and accessible UI components.

Styling & CSS Frameworks: Expertise in **Tailwind CSS**, **SASS**, **LESS**, and CSS-in-JS solutions like **Styled Components** and **Emotion**, supporting modular, maintainable styling strategies.

Performance Optimization: Strong grasp of **Web Vitals**, **lazy loading**, **code splitting**, **tree shaking**, and build optimization with **Webpack** and **Babel** to ensure fast load times and efficient rendering.

API Integration: Integrated **RESTful APIs**, **GraphQL**, and tools like **Apollo Client**, delivering dynamic data-driven interfaces with secure and efficient communication.

Testing & Quality Assurance: Skilled in front-end testing with **Jest**, **Cypress**, **Enzyme**, and **React Testing Library**, ensuring high test coverage and UI stability across releases.

Cross-Platform Development: Experienced in building cross-device apps using **React Native**, implementing responsive UIs and native-like interactions on iOS and Android.

UX Collaboration & Prototyping: Collaborated with UI/UX teams using tools like **Figma**, delivering pixel-perfect designs and maintaining design consistency across components.

Agile Methodologies: Worked in **Agile/Scrum** environments using **JIRA**, **Trello**, and **Slack** for sprint planning, backlog grooming, and cross-functional collaboration.

Development Tools: Proficient in **VS Code**, **WebStorm**, **Postman**, browser dev tools, and Git-based workflows for debugging, version control, and efficient development.

EXPERIENCE

Collabera, (Levis) Remote - *Senior front end engineer, Front end architect*

April 2021 - PRESENT

- Architected and delivered scalable, high-performance e-commerce platforms using **React, React Native, Next.js, TypeScript, and JavaScript**, with a focus on SEO, accessibility (ADA/WCAG), and modularity.
- Led the design and implementation of a **micro frontend architecture** to enable independent deployment pipelines and feature ownership across teams.
- Developed reusable, type-safe UI components and custom hooks using **React + TypeScript**, ensuring code reliability and scalability.
- Built responsive, accessible UIs using **HTML5, CSS3, SCSS, and styled-components**, meeting cross-browser and WCAG standards.
- Applied **performance optimizations** using **SSR (Next.js), code splitting, lazy loading, memoization, and image optimizations**, improving page speed and Core Web Vitals.
- Managed application-wide state with **Redux Toolkit** and **Context API**, supporting complex business logic with minimal re-renders.
- Developed and deployed cross-platform mobile applications using **React Native**, targeting both **iOS** and **Android**, with a shared codebase to reduce development time and maintenance overhead.
- Applied mobile-specific UI patterns with **React Native Paper, Styled Components, and Flexbox**, ensuring pixel-perfect design across screen sizes.
- Implemented smooth navigation using **React Navigation** with support for deep linking, modals, and nested stack/tab structures.
- Integrated **RESTful** and **GraphQL APIs**, optimizing network usage and security via token management and caching strategies.
- Created complex, validated forms using **Formik** and **Yup**, improving usability and reducing client-side errors.
- Delivered data-driven dashboards and reports using **Chart.js** and **Recharts**, supporting marketing and analytics needs.
- Set up and maintained **custom Webpack** and **Babel** configurations for optimized bundling, tree shaking, and polyfilling.
- Enforced code quality standards using **ESLint, Prettier, and Husky pre-commit hooks**, driving a clean and consistent codebase.
- Established **CI/CD pipelines** with **GitHub Actions, Docker, and Kubernetes**, automating build, test, and deployment workflows.
- Deployed frontend and backend services to **AWS** (S3, CloudFront, Lambda, EC2), ensuring scalability, availability, and fast content delivery.
- Wrote and maintained **unit, integration, and E2E tests** with **Jest, Enzyme, and Cypress**, achieving high test coverage and stability.
- Enabled A/B testing and personalization via **Adobe Target**, supporting growth and conversion experiments.
- Authored detailed **developer documentation** and architecture guidelines, accelerating onboarding and ensuring team alignment.
- Mentored junior engineers on **React, TypeScript**, performance tuning, testing strategies, code review, and scalable frontend architecture.
- Collaborated with UI/UX, DevOps, QA, and business stakeholders to ensure timely delivery of high-quality features.
- Worked in **Agile/Scrum teams**, participating in daily stand-ups, sprint planning, retrospectives, and backlog grooming to ensure timely delivery and team alignment.

Capgemini (Quartix), Florida - Senior front end engineer

March 2017 - April 2021

- Led the front-end development of real-time vehicle tracking apps using **React, React Native, and Redux, JavaScript, TypeScript**, focused on high-performance UIs and live data visualization.
- Built and architected dynamic dashboards with live map updates, trip logs, vehicle metrics, and performance analytics using **Chart.js, Recharts**, and **custom React components**.
- Designed responsive, pixel-perfect UIs using **Tailwind CSS, SASS/LESS**, and **CSS-in-JS libraries** (Styled Components, Emotion) across web and mobile platforms.
- Designed clean, mobile-first UIs with **React Native Paper, Styled Components**, and responsive **Flexbox** layouts.
- Used **Redux, Context API**, and **redux-persist** for reliable state management and offline support.
- Implemented advanced **SEO strategies** including semantic HTML, structured data (JSON-LD), meta tags, canonical URLs, and optimized page load performance.
- Managed and optimized **tag management** and third-party analytics integrations using **Tealium**, ensuring seamless data flow without impacting performance or SEO.
- Utilized **WebSockets and Socket.io** to deliver real-time location updates and alerts directly into the frontend, enabling live fleet monitoring.
- Implemented secure authentication flows (OAuth2, JWT, MFA) in the frontend, integrating with AWS Cognito for session handling.
- Integrated frontend with **REST APIs and WebSocket endpoints**, optimizing data handling and user feedback in real-time.
- Applied **advanced state management** with Redux, Context API, and middleware (Thunk, Saga) to ensure smooth real-time UI behavior.
- Wrote modular and testable code with **React Hooks**, custom hooks, and component-based architecture for high maintainability and reusability.
- Optimized frontend performance through code splitting, lazy loading, memoization, and fine-grained rendering control.
- Designed frontend CI/CD pipelines using **GitHub Actions** and **Docker**, contributing to automated builds and stable delivery workflows.
- Developed unit and end-to-end tests using **Jest, Mocha**, and **Cypress**, maintaining high quality and minimizing regressions.
- Developed and launched dynamic **A/B testing** and **personalized user experiences** through **Adobe Target**.
- Collaborated closely with product, UI/UX, and backend teams in Agile sprints to deliver timely and well-tested releases.
- Collaborated with UX teams to enforce **design systems** and **style guidelines**, delivering pixel-perfect, accessible (ADA/WCAG) UIs.
- Authored and maintained frontend documentation and coding standards to ensure long-term maintainability and team consistency.

Infosys (Re/Max), Florida - Full stack engineer, Front end engineer

January 2014 - March 2017

- Led the development of modern, responsive real estate web applications for **Re/Max**, leveraging the **MERN stack** (MongoDB, Express.js, React.js, Node.js) to deliver fast, scalable, and user-friendly property search and management platforms.
- Built and optimized complex UI features such as **advanced search filters, interactive map-based listings, and real-time updates**, using **React.js, Vue.js**, enhancing user engagement across desktop and mobile.

- Architected and maintained reusable **component libraries** and **design systems** with **React**, **TypeScript**, driving consistency and developer efficiency across projects.
- Integrated and maintained **Redux** for scalable state management and implemented efficient **API communication layers** using **Axios** and **GraphQL**, improving app responsiveness and maintainability.
- Led cloud infrastructure setup and deployment using **AWS** services including **EC2**, **S3**, **Lambda**, **API Gateway**, and **CloudFront**, ensuring secure, scalable, and cost-effective application hosting.
- Built backend services and APIs using **Node.js** and **Express.js**, implementing authentication, authorization, logging, and data validation features to ensure robust and secure operations.
- Designed and implemented **MongoDB schema models**, performed indexing, and optimized queries to support high-throughput and low-latency access to large property datasets.
- Integrated third-party services such as **payment gateways**, **geolocation APIs**, and **CRM tools**, enabling seamless business workflows and user experiences.
- Applied performance optimization techniques including **lazy loading**, **server-side rendering (SSR)**, **code splitting**, and **caching strategies**, significantly improving page load times and Core Web Vitals.
- Conducted comprehensive **unit, integration, and E2E testing** using **Jest**, **Cypress**, and **Postman**, achieving high test coverage and ensuring production stability.
- Drove Agile development processes, coordinated **cross-functional teams**, and ensured timely delivery of high-quality features through **daily stand-ups**, **sprint planning**, and **code reviews**.
- Authored **technical documentation**, deployment runbooks, and API references to support scalability, maintainability, and onboarding for new engineers.
- Mentored junior developers in **frontend architecture**, **Node.js backend design**, **CI/CD pipelines**, and **cloud best practices**, contributing to overall team growth and project velocity.

EDUCATION

University of Florida, Gainesville, Florida - *Bachelor's Degree in computer science*

August 2009 - December 2013
