EDUCATION

Bachelor's degree

Computer Science

The University of Liverpool

Apr 2012 - Aug 2015

Liverpool

SKILLS

Frontend

Angular

React

Vue

Backend

Django

Flask

Database

MySQL

PostgreSQL

Oracle

CI/CD

AWS

Heroku

DigitalOcean

GCP

Docker

Kubernetes

ElasticSearch

CAREER OBJECTIVE

I am well versed in all phases of software development from concept to deployment. I bring a strong technical knowledge and pragmatic expertise in single-page web application and REST API design and development. Experienced with developing and mentoring junior engineers, whether in-house or in online communities. Consider myself a product-focused engineer with deep interest in bringing the best impactful products to end users.

WORK EXPERIENCE

Senior Software Engineer

deemsoft.com

Mar 2020 - May 2022 / Remote

- Developed the website using Django and react.js and deployed using kubernetes experience.
- Planned, lead and executed numerous cross team, high impact front and backend projects across Homepage, Playlists and Search products, leveraging Docker, React, Django, and Kubernetes
- Implemented MVC architecture in developing the web application with the help of Django Framework
- Used REST API to modify small portions of the web pages by sending a request to the server avoiding the need of reloading the entire web page
- Involved in designing user interactive web pages as the front end part of the web application using various web technologies like HTML, JavaScript, React, JS, JQuery, Ajax and implemented CSS for better appearance and feel.
- Implemented and modified various SQL queries and Functions, Cursors and Triggers as per the client requirements.
- Actively involved in developing the methods for Create, Read, Update and Delete(CRUD) in Active Record.
- Implemented Data modeling and Database schema.
- Designed and managed API system deployment using fast http server and AWS architecture.
- Helped in designing and developing an application for profitability. Worked with AWS Athena and AWS Glue for data stores.
- Managed code versioning with GitHub and deployment to staging and production.
- Involved in code reviews using GitHub pull requests, reducing bugs, improving code quality.
- Implemented unit tests using pytest, and mock objects for improved code quality and maintainability.
- Build scalable cloud infrastructure and CI/CD workflow, deploy and configure AWS services.

Technology

AI

ML/DL

OCR

NLP

- Implemented SSO authentication using SAML, oauth. Used Fortinet, Onelogin as idp Environment.
- Python, Django, REST APIs, MySQL, Git, JIRA, React.js, Docker, AWS Web Services, S3, Lambda, DynamoDB

Backend Engineer

kea.ai

Feb 2018 - Dec 2019 / Remote

- Developed the Web API and Backend based on Deep Learning Experience.
- Developed entire backend modules, REST APIs using Python, Django web framework
- Implemented the MVT structure, and integrated a token-based authentication workflow for this web app.
- Integrated Deep Learning engine using Tensorflow, and implemented API for human pose estimation using Deep learning
- Used Pandas library for statistics Analysis
- Used Numpy for Numerical analysis, and matplotlib for data visualization
- Build SQL queries for performing various CRUD operations like create, update, read and delete.
- Build SQL Database schema and Implemented ORM design.
- Helped integrate 3rd -party APIs including social media and Google Maps and Payment.
- Increased development team ownership of the deployment process by removing the bottleneck of the infrastructure team for updating the infrastructure requirements for services by redesigning our application deployment strategy to leverage an Infrastructure as Code solution in conjunction with our GitLab CI/CD pipelines.
- Install and configuring monitoring scripts for AWS EC2 instances
- Developed serverless services such as AWS Lambda, SageMaker
- Deployed the project into Heroku using Git version control system
- Implemented automated productions tasks
- Set up continuous integration and deployment with Azure DevOps
- Actively participated in Agile development process, including daily stand-ups sprint planning, and retrospectives Environment.
- Python, Django, REST APIs, React.js, Pandas, Matplotlib, MySQL, Git, JIRA, Docker, AWS Web Services, S3, Lambda, DynamoDB

Python Software Developer

Anyline.com

Feb 2016 - Nov 2017

- Developed the Frontend using React.js and Backend using Python Django Experience.
- Worked on developing internal testing tools written in Python.
- Built an innovative E-learning web application with Django and GraphQL
- Developed entire frontend using React.js framework.
- Performed optimization of test server by implementing multiprocessing for the caching system.
- Improved user experience.

- Actively involved in developing the methods for Create, Read, Update and Delete (CRUD) in Active Record.
- Managed large datasets using Pandas data frames and MySQL
- Wrote and executed various MySQL database queries from python using Python-MySQL connector and MySQL db package.
- Built various graphs for business decision making using Python matplotlib library.
- Used Celery as task queue and RabbitMQ, Redis as messaging broker to execute asynchronous.
- Integrated 3rd APIs such as Stripe payment processing
- Deployed the web app on kubernetes.
- Collaborated with an agile team, and helped prioritize and scope feature requests to ensure that the biggest impact features.
- Spearheaded 100% of code repositories in GitHub and set up automated CI/CD pipeline for all product lines Environment.
- Python, Django, REST APIs, React.js, Pandas, Matplotlib, MySQL, GraphQL, Git, JIRA, Docker.
