EDUCATION

Computer Science

Texas State University

📅 Apr 2010 - Apr 2014

📍 San Marcos, Texas

🎓 GPA:3.4/4

Awards

- Bachelor degree

SKILLS

Frontend

- HTML/CSS/JavaScript
- Angular/AngularJS
- Blazor
- Razor
- ReactJS
- VueJS
- TypeScript
- Redux/NgRx/Vuex

CSS Frameworks

- Ant Design
- Bootstrap
- Bulma
- Material UI
- Tailwind CSS
- DevExpress
- Syncfusion
- Kendo
- Telerik

CAREER OBJECTIVE

8+ years of experience in Software Application Development. Application development using with C#, WCF, WPF and Winforms. Expert at Frontend frameworks such as React, Angular and Vue.JS. Good Knowledge to web Technologies: ASP.NET, Node.JS, ASP.NET core. Experience with Trello, Github/GitLab, Azure DevOps, Agile and CI/CD. Ability to learn & develop using new technologies quickly. Highly motivated, quick learning team player with good technical skills. Coordinating with the team and with client.

WORK EXPERIENCE

Full Stack Developer

Tesora International

📅 Jul 2020 - Dec 2022

📍 Remote

- Developed frontend using Angular and admin-panel using React.
- Used Redux(Thunk) and NgRx for the flex pattern and selected Tailwind CSS and Styled Components for CSS framework.
- Added mint, transfer logic with Smart contract base on ERC721 with Solidity using Truffle.
- Created RESTful endpoints using Asp.net Core Web API and PostgreSQL
- Used FluentValidation, Cronos, Nethereum and Swashbuckle packages for backend development.
- Hosted backend using AWS Elastic Beanstalk and set CI/CD on the Azure DevOps.
- Implemented Microservice to the backend and divided backend to 3 main logic layers.
- Implemented SSO using own company's third party API and used OpenId
- Using IPFS and infra for NFT minting and implemented auction, bid, create and offer login in backend.
- Developed Restful APIs using Symphony backend and integrated with Vue.js frontend.

Full Stack Developer

TePe USA

📅 Nov 2018 - Jun 2020

📍 Remote

- Used React JS for creating reusable UI components and have chosen Material UI for CSS styling
- Implemented Auth0 and html2canvas package for the frontend
- Created Menus and Drawer component by using Typescript.
- Analyzed code quality and performance with jsHint and YSlow
- Frontend project hosting using Digital Ocean and set CI/CD on the Azure DevOps.
- Implemented Repository pattern to the backend and follow code-first design, Domain Driven Design and SDLC.
- Implemented Swashbuckle nuget package for SwaggerUI for API
- Using GraphQL and used xUnit and nUnit for test case using Moq.

Backend

- Node.JS
- Laravel
- Django
- Spring Boot

Asp.Net Side

- ASP.NET
- ASP.NET Core
- ASP.NET Web API
- ASP.NET MVC
- Blazor Server App
- Blazor Web Assembly

Database

- Firebase
- MS SQL Server
- Mongo DB
- MySQL
- Oracle
- PostgreSQL

Desktop Application

- Windows Forms
- WPF
- MAUI
- UWP

Mobile Application

- Java/Kotlin
- Flutter
- React Native
- Swift

Blockchain

- Cryptocurrency
- Ethereum
- NFTs
- Smart Contracts
- Solidity

Game Development

- Cocos
- Unity
- Play2Earn
- GameFi

ASP.NET Core Developer

Let's Use Data

📅 Apr 2017 - Oct 2018

📍 Remote

- Collaborating with the project manager, business analysts, and other stakeholders to define the system requirements, features, and functionalities of the LMS.
- Designing the system architecture and database schema, ensuring scalability, security, and performance.
- Developed many compilers using C# like C# compiler, Excel compiler, Java Compiler and so on.
- Implementing the user interface (UI) using Asp.net MVC, HTML5, CSS, and JavaScript.
- Developing the backend services and APIs using C#, .NET Framework, and Entity Framework.
- Integrating third-party tools and plugins such as payment gateways, video hosting services, and analytics platforms.
- Implementing authentication and authorization mechanisms using OAuth 2.0 and OpenID Connect.
- Testing the system features and functionalities using unit testing, integration testing, and acceptance testing.
- Deploying the system to the production environment using Azure DevOps and Azure App Service.
- Providing technical support and maintenance to the system users, troubleshooting issues, and fixing bugs.

ASP.NET MVC Developer

Bell Boy Room Service

📅 Apr 2015 - Feb 2017

📍 Remote

- Developed frontend using Angular, HTML/CSS/JavaScript and JQuery.
- Used code-first design pattern and EF6.0, Firebase, MS SQL Server for database management.
- Implemented real time chat server for chat and used MVVM pattern for backend development.
- Used repository pattern and microservice for backend development and used LINQ.
- Used Twilio, Smtplib nuget package for client service and swashbuckle.
- Integrated Payment process with bank account and use Stripe API.
- Followed SDLC for development and xUnit, NUnit for test cases.
- Divided backend into 3 logic layers so users can use backend easily.
- Used Twilio package for sending SMS and LinqToExcel, Syncfusion UI for the document printing.

NET Developer

Dorm Mom

📅 Sep 2014 - Feb 2015

📍 Remote

- Developed new features and maintained existing ones using ASP.NET MVC, C#, and JavaScript.
- Designed and implemented the database schema using SQL Server and Entity Framework.

Nuget Package

- AutoMapper
- Cronos
- FluentValidation
- xUnit
- LINQ
- Nethereum
- Swashbuckle
- JwtBearer
- OpenIdConnect
- Npgsql
- EntityFramework
- EntityFramework Core
- MongoDB
- Stripe
- SendGrid
- GoogleMaps API
- Twilio
- Signal R

Tools

- AWS Service
- Azure DevOps
- Bitbucket
- cPanel
- Docker
- Digital Ocean
- Jira
- Github
- Gitlab
- GCP
- Visual Studio
- Visual Studio Code
- Trello

- Developed RESTful APIs for integrating with third-party services.
- Implemented responsive design using Bootstrap and jQuery.
- Used Git for version control and collaborated with other developers using GitHub.
- Implemented real-time notifications using SignalR, improving the user experience and reducing email traffic.
- Improved the performance of the application by optimizing SQL queries and implementing caching mechanisms.

PROJECTS

Tesora International

Full Stack Developer

📅 Jul 2020 - Dec 2022

- Implemented microservice to the backend and used Npgsql for PostgreSQL database.
- <https://github.com/TopTen1004/Tesora-Backend>
- Developed frontend using React, Redux(Thunk), NgRx(Rxjs) and Styled Components.
- <https://github.com/TopTen1004/Tesora-Frontend>
- <https://www.tesora.art/>
- This is my latest ASP.NET Core web API endpoints hosted on AWS.
- <http://nftdatabase-dev.us-west-2.elasticbeanstalk.com/swagger/index.html>

TePe USA

Full Stack .Net Developer

📅 Nov 2018 - Jun 2020

- Developed backend using Repository pattern and implemented Code First, Domain Driven Design, T-SQL.
- <https://github.com/TopTen1004/TePe-API>
- Developed frontend using React(TypeScript), Material UI, Redux, Hooks and WireFrame to control the canvas.
- <https://github.com/TopTen1004/TePe-Frontend>
- <https://www.tepe.com/global/>

Bell Boy Room Service

Asp.Net MVC Developer

📅 Apr 2015 - Feb 2017

- Used Asp.Net MVC and Asp.Net web api for the project, implemented microservice.
- <https://app.bell-boy.com/>
- <https://github.com/TopTen1004/App-Bell-Boy>
