Product Management

Dmitry Zubovich

Lead Product Manager at JettyCloud
Batumi, Ajaria, Georgia

Summary

A Lead Product Manager with over 15+ years of proven experience in the fields of UCaaS, Cloud Business Communications, and Product Management. With a strong background in product management and a deep passion for innovation, I specialize in developing and managing solutions that empower businesses to communicate effectively and efficiently.

In recent years I have successfully led cross-functional teams in development and delivering comprehensive communication solutions, including voice, video, messaging, and collaboration platforms, all powered by cloud technology.

As a Product Owner, I have been responsible for driving the product vision, strategy, and roadmap. Utilizing Agile methodologies, I have championed iterative development cycles to continuously enhance product features and align them with customer needs.

If you are looking for a Lead Product Manager with a track record of driving product success in UCaaS and Cloud Business Communications, I would be delighted to connect with you.

Ready for relocation. Need visa (Blue Card) sponsorship.

Experience

JettyCloud

Lead Product Manager

March 2022 - July 2024 (2 years 5 months)

Georgia

JettyCloud LLC is a RND department of Ringcentral Inc. in Georgia.

Manage technical projects from initiation to completion, defining the project scope, objectives, and deliverables.

Develop comprehensive project plans, including timelines, resource allocation, and risk assessments

Contribute to the design of technical solutions with the technical experts.

have been working with Strategic Partners as Vodafone, Telus, Charter and others across the globe.

Along with progressing our partnership we extend product offering to cover a broad variety of partners' customer base from different segments and verticals.

RingCentral

Lead Product Manager

September 2010 - July 2024 (13 years 11 months)

Ringcentral is the number one cloud communications provider worldwide.

Its 5M users around the world use RingCentral daily to stay connected with their co-workers and clients.

Nordigy

Staff Product Manager

September 2010 - March 2022 (11 years 7 months)

St Petersburg, St Petersburg City, Russia

Nordigy is RND department of RingCentral Inc. in Russia, Saint Petersburg.

Nordigy developed for an American UCaaS platform RingCentral. Its 5M users around the world use RingCentral daily to stay connected with their co-workers and clients.

Key activities worked on:

- Responsible for the product vision, planning, design, usability and quality of releases.
- Translate roadmaps into manageable product backlog.
- Analyze high-level feature brief and detailize them further into user stories/feature requirements.
- Maintain the prioritized backlog of user stories, features and defects.
- Understand the features and changes in product requirements and support the sprint planning exercises.
- Track feature/cross-components dependencies.

During that period I organized new partner onboarding process.

Coordinated interaction between Analytics and Glip (Message) teams worked on Adoption and Usage analytic report.

Huge Adoption and Usage report that required coordination of Analytics, Glip (Messages) and RCV (Video) teams efforts went GA in time and became the main Analytics Portal report.

Fortess

Product Manager

August 2008 - July 2010 (2 years)

Novosibirsk, Russia

Projects:

- Development of a solution for remote control of mobile devices for a Danish customer.

Using the created software package, companies will be able to monitor the status of their mobile devices and solve problems without physical access to them, for example, through remote control of the device's desktop, file transfer, working with the registry, processes and services. In addition, companies will also be able to get features such as determining the geographic location of the device and protecting confidential data in case of loss or theft.

My responsibilities included collecting and analyzing customer requirements, compiling and agreeing on project requirements specifications, designing and presenting user interface prototypes.

- Development of a solution for the automation of collection agencies.

The product allows you to optimize the work of various departments: managers, collectors, etc. - both in the office and beyond. The solution covers the entire cycle of work with credit matters:

- o creation of a secure base of credit affairs and their distribution by collectors
- o credit planning and monitoring
- o generation of reports on employee performance and collected funds

My responsibilities included: collecting and analyzing the requirements of potential customers, obtaining expert assessments, drawing up specifications of project requirements, designing user interface prototypes, monitoring execution, monitoring and receiving results.

- Implementation by SGT (France) television broadcast automation complex for ProfMedia (Moscow).

I served as a project manager at SGT. My responsibilities included managing the implementation project on the side of the Customer. Work took place in France and in Moscow.

SGT is one of the leading media broadcast automation solutions companies. ProfMedia is the largest private media holding in Russia (TV-3, MTV, 2x2).

DOMOCENTR Holding Company

Project Manager

March 2006 - July 2008 (2 years 5 months)

Novosibirsk, Russia

DOMOCENTR was one of The largest Russian DIY materials selling company.

Projects:

Warehouse Management System (WMS) Logistic Vision Suite implementation.

Responsible for management all phases of project.

- Took part in software selection and solutions costing.
- Responsible for work planning, status and tracking.
- Supervised business analysts to develop detailed system and business requirements and business process design.
- Designed deployment and data migration strategy.
- Managed testing and training process.
- Coordinated integration with corporate host-system.

Top-Kniga

Project Manager

March 2005 - October 2005 (8 months)

Novosibirsk, Russia

Top-Kniga was the largest Russian book-selling company.

Major projects:

- IT Project Management for ERP Oracle JD Edwards Enterprise One implementation. This project had a team size of over 50 employees, consultants and contractors with a total workplan of over 80,000 hours. Responsible for work planning, status and tracking, issues support & management, project scope & change management, project staffing, team integration and managing overall project quality and deliverables. Activities included overall strategy & planning, testing strategy & planning, training strategy & planning, implementation support planning, converted data validation planning and infrastructure planning. I contributed to solutions design and QA of solutions to delivery requirements, troubleshooting, work-arounds and issues resolution from a management, functional and technical perspective.
- Project Manager for HelpDesk system design and implementation. Responsible for coordination of process definition and mapping, requirements gathering, facilitation and documentation, specification development and reviews, extensive testing, training and implementation coordination.

Kovrovj Dvor Inc

5 years 9 months

Project Manager

October 2003 - March 2005 (1 year 6 months)

Novosibirsk, Russia

Kovrovj Dvor was the largest DIY selling company in Siberian region.

Major projects:

- Managed a team of developers in the design and implementation of a three-tiered web-based help-desk management system that enabled to reduce the time it took for a customer to have their problem resolved, register all problems and generate reports.
- Development and implementation system of address goods storage at company warehouses when any item has it's own address at the rack that reduced the time of goods selection up to 30%.
- Resource management system for the Facilities Department.
- Assessed project feasibility and gathered business requirements for Enterprise Resource Planning (ERP) System implementation.

Senior Software Developer

July 1999 - October 2003 (4 years 4 months)

Novosibirsk, Russia

Responsibilities:
