

Francisco German

Senior Full Stack Engineer

KISSIMMEE, FL | francisco.topdev@gmail.com | (512) 333-1856

Professional Summary

Francisco is a highly skilled full-stack engineer with over 10 years of experience in developing top-tier web applications. He is proficient across a wide range of platforms and tools. Throughout his career, he has built numerous web applications that have enhanced customer satisfaction by an average of 30%. With expert knowledge of various programming languages and frameworks, along with extensive experience working with diverse database structures, Francisco has consistently demonstrated his ability to mentor and lead teams. As a result, he has helped improve team satisfaction scores by an average of 20%.

Professional Experience

Senior Full Stack Engineer

January 2023 – Present

Blue Origin

- Developed and maintained a robust manufacturing dashboard that provided real-time visibility into production processes, leading to a 20% increase in operational efficiency, resulting in a highly functional and visually appealing interface.
- Successfully led the migration effort from Angular 4 to a modern Angular 13 frontend, resulting in a more responsive and maintainable user interface that aligns with current web development best practices.
- Implemented data visualization tools, enabling stakeholders to analyze manufacturing data trends and make data-driven decisions, contributing to a reduction in production errors by 15%.
- Designed and implemented a GraphQL layer using GraphQL Server to efficiently combine data from microservices, streamlining data retrieval processes and reducing API call overhead by 30%.
- Contributed to the development and maintenance of a microservices architecture using .NET 5, ASP.NET CORE, enabling scalable and modular application design.
- Implemented test-driven development (TDD) practices, writing tests before coding, to drive the development of microservices features and ensure code quality.
- Worked closely with DevOps teams to containerize microservices using Docker and orchestrate them with Kubernetes, optimizing resource allocation and scalability.
- Conducted regular code reviews and collaborated with team members to maintain high code quality, resulting in fewer bugs and faster feature deployment.

Senior Full Stack Engineer

September 2021 – December 2022

Okta

- Developed a mentorship and training program for junior web developers around the world using the agile development platform Jira. And improved the team satisfaction score by 25%.
- Designed and developed GraphQL API services using ASP.Net Core for a large-scale platform and developed frontend using Angular.

- using **.NET Core** Implemented microservices architecture and **Docker** for scalable and modular applications
Deployed the Redis service to cache queries to retrieve data and reduce response time.
- Shortened the deployment time for critical Agile project infrastructure from hours to minutes and decreased costs by 15% each month by eliminating unnecessary servers and consolidating databases.
- Led a development team to build core applications and many web-based applications using JavaScript/TypeScript, Angular, React/Mobx, Python/Django, Spring Boot, and Node.js/Express with Jira.
- Led the implementation and optimization of GraphQL in e-commerce platforms, leveraging its efficient querying capabilities to enhance data retrieval and improve overall application performance.
- Utilized GraphiQL for API exploration, testing, and documentation, streamlining development processes and fostering collaboration among cross-functional teams.

Senior Full Stack Engineer

July 2019 – August 2021

Smart Soft Team

- Maintained complex technology infrastructure and collaborated with the product team to implement new features and strategically plan for future products.
- Unit testing and e2e testing to increase test coverage to over 90%. (Jest/pytest, Cypress/Selenium)
- Automated and optimized the collection of data using SQL, reaching over a 35% system response time boost.
- Fixed bugs on existing websites and implemented enhancements that improved functionality and efficiency by 20%.
- Participated in the business management team and improved the page speed by 15% for the company's e-commerce platform that generates \$18 million annually in revenue by leveraging browser caching and improving server response times with Nuxt, TypeScript, and GraphQL (Relay).
- Strong knowledge of working with GraphQL schema, queries, and mutations to interact with MongoDB and several other data layers.
- Upgraded the company's management system backend using Spring Boot, Neo4j, and PostgreSQL.

Back End Engineer

May 2018 – July 2019

Smart Soft Team

- Implemented JWT Token based authentication to secure the ASP.NET Core Web API and provide authorization to different users, and developed stored procedures, functions, and views for accessing the database.
- Analyzed system requirements to lead to the development of three ASP.NET and Express.js projects, application enhancements, and various maintenance activities.
- Built proof of concepts with Node.JS REST frameworks like Express, and HapiJS and helped the team choose the right framework for development.
- Consulted with engineering team members to determine system loads and develop improvement plans.
- Developed views and templates with Python and Django's view controller and templating language to create a user-friendly website interface.
- Collaborated with team members and upgraded the company's management system backend using Spring MVC and PostgreSQL.
- Developed a mock data generation feature that is integrated with the GraphiQL IDE interface to allow users to send queries against their custom generated schema and render mock results in order to familiarize users with the GraphQL syntax.

Full Stack Engineer

August 2017 – May 2018

Smart Soft Team

- Handled programming tasks and maintained internal websites with a high success rate of 98% in product update deployment.
- Developed a lead marketing MySQL database, collecting, categorizing, and filtering leads from various stakeholders.
- Spearheaded the transition from the LAMP stack to Django and Next, reducing latency by 35% and increasing database efficiency by 20%. Applied modern technologies such as GraphQL (Apollo).
- Managed a team of front-end developers throughout the project life cycle, provided coaching and mentorship, and established a collaborative work culture centered on creativity and empowerment. And reviewed team members' code to increase code quality.
- Built 4 minimum viable products (MVP) with PostgreSQL, MongoDB, Angular, and ASP.NET.

Senior Front End Engineer

June 2016 – August 2017

Microsoft

- Contributed to building the company's management system, which processed, analyzed, and visualized data using React, Redux, Node.js, and the GraphQL (Apollo) stack.
- Implemented the UI and related tests of the company's ERP system, reducing operational costs by 6%.
- Developed and built dynamic user interfaces to support large-scale e-commerce platform projects in agile environments, increasing client account engagement by 8%.
- Developed training web applications using Vue, Vuex, GraphQL (Relay), and Django, receiving feedback and guidance from the client's lead designer.
- Implemented a recursive algorithm to parse large GraphQL introspection queries into a dotfile format in order to visualize the one-to-many relations between schemas.
- Involved ASP.NET MVC web pages (C# code behind) for authentication, registration, maintenance, document uploading, and the faculty approval system.

Front End Engineer

September 2015 – June 2016

Microsoft

- Translated the design team's UX wireframes and mockups into responsive, interactive features using HTML/CSS and JavaScript.
- Designed and developed the UI for applications and modules using React, Vue, and AngularJS.
- Created custom front-end frameworks for marketing, advertising, and e-commerce websites, platforms, and applications, which included managing all aspects of prototyping, wireframing, debugging, and coding activities with PHP/Laravel.
- Developed innovative features in coordination with stakeholders, technical teams, and the product management organization to improve user satisfaction by 5%.
- Collaborated with the UX/UI design teams to improve the website and applications, increasing conversion rates by 25%.

Education

Bachelor of Science in Computer Science | University of Florida

2011 – 2015

Key skills

- HTML, CSS, JavaScript, TypeScript
- React, Next, Vue, Nuxt, Angular
- C#, ASP.NET CORE/MVC/Web API
- Python, Django, Flask, FastAPI
- PHP, Laravel, CI, Symfony
- Node.js, Express, Nest
- MySQL, PostgreSQL, MongoDB, Neo4j, Redis
- REST API, GraphQL, Apollo, Relay
- Jest, Pytest, Cypress, Selenium, Mocha, Chai
- AWS, CI/CD, Docker, Kubernetes
- Jenkins, GitHub Actions, CircleCI
