WORK HISTORY

Senior Full Stack Engineer

Mind2Matter, Remote

Jan 2020 – Present

- Developed the REST API using **.NET Core** and SPA frontend using **Angular** and **MUI**.
- Integrated payment gateways such as **Apple Pay, Stripe, PayPal**, etc.
- Debugged the API middleware issues and refactored controllers, leading to reducing API response time by 9%.
- Improved **Angular** frontend performance by refactoring codebase and optimizing assets.
- Translated **Figma** designs to responsive web pages and UI components using Angular.
- Integrated **Google Looker** and analytics and using the result leading to improve user keep and convenience with 8%.
- Wrote an API documentation using **Swagger** and collaborated with QA team.
- Deployed the microservice architecture application on **AWS Lambda**.
- Maintained detailed technical documentation, including API documentation, code comments, and system architecture diagrams.
- Wrote up 2 technical specifications and 10s of tickets for new features and generated technical steps to build said features from end-to-end and implemented them
- Mentored new members to be familiar with products and new environment.
- Contribute to stand up, sprint planning, and retro meetings 3 days a week, delivering production code every day and ticket commitments every week.

Senior Full Stack Engineer

Citi, Remote

April 2016 – Dec 2019

- Designed and developed the new features and gave advice to improve software efficiency.
- Integrated **Microsoft Azure** with cloud platforms and enabled to develop cloud-native applications with **.NET Core**.
- Designed and developed a package tracking tool that consumes UPS, USPS, and FedEx services.
- Resolved frontend issues and improved user experience, leading to an increase in customer retention by 11%.
- Used many server UI controls like Data Grid and Detailed Grid controls.
- Write unit & E2E tests for APIs, components, and UI flow.
- Optimized the SQL queries and indexed the database to reduce the response time.
- Transformed the vector data for houses and other objects by customizing default geographic calculation helpers and using them.
- Improved system stability and performance by reporting and rectifying bugs identified during analysis or development phases.
- Eliminated the high volume of duplicate database entries by investigating and resolving a critical bug.
- Created a middleware for an image optimization to be able to reduce the static file storage size on **AWS S3**.

Full Stack Engineer

Aetna

Jun 2012 – March 2016

- Built portal pages used by 20k+ investors and sponsors.
- Developed analysis pages, created data visualizations, and customized graph components.
- Leveraged the REST APIs efficiency by optimizing database queries and integrated external APIs and 3rd party libraries.
- Involved in designing and developing web forms using **C#, ASP.NET, .NET Framework**, and **XML**, contributing to a 25% improvement in form processing efficiency.
- Worked with **.NET Server Controls**, Web User Controls, and Data Grid Web Controls and created numerous Custom Controls.
- Extensively used Grid View with sorting and paging.
- Automated key business processes by leveraging DTS (2000) and Integration Services (2005), reducing manual data entry tasks by 12% and decreasing processing time by 10%.
- Setup and maintained backend-as-a-service platform for App beta through to the full release.
- Worked on ERPs, Media streaming services, and MVPs for the company and management teams.
- Created custom data visualizations and developed an online media converter using several codec.

SUMMARY

Senior Full Stack Engineer with 12+ years of experience in designing, developing, and deploying full stack web applications.

SKILL

- C/C++ / C# / .NET Core**
- .NET Framework / WPF / Entity Framework**
- SignalR / LINQ / TPL**
- SQL Server / PostgreSQL**
- Angular / NgRx**
- ES6/ES7 / TypeScript**
- GraphQL / REST API**
- Material UI (MUI) / Tailwind CSS**
- Azure / AWS**
- Agile / Lean / TDD / BDD**
- Docker / Kubernetes / Jenkins**

EDUCATION

2008 – 2012

Bachelor's degree, Computer Science
Baylor University
