

Timmy Willison

Principal Engineer | jQuery & React & Node Expert

(423) 251-5009 • timmywillison375@gmail.com • Chattanooga, TN

Summary

Senior Full Stack Engineer with 15 years of experience in software development. Result-oriented, enthusiastic developer with a good understanding of object-oriented analysis and design seeking opportunities where knowledge and technical experience can be gained and shared. Looking for a job in software engineering that can utilize my programming abilities and challenge me to strive further.

Professional Skills

- JavaScript, TypeScript, Python
- React, Next.js, Vue.js, React Native
- Node.js, Django, Flask, FastAPI
- Material UI, Tailwind CSS, Chakra UI, Bootstrap
- Jest, Cypress, Mocha
- RESTful API, GraphQL
- MySQL, MongoDB, PostgreSQL, Redis
- AWS, GCP, Docker, Kubernetes, Jenkins, Microsoft Azure
- Storybook, Webpack, Vercel

Experience

Sensible.so – Senior Principal Engineer

Sep 2022 – Present

- Developed and maintained web and mobile applications using React, Next.js, React Native, Node.js, and Python, supporting a user base of over 200,000 across various platforms.
- Led the development of a new AI-driven recommendation engine for Worbler.ai web app, marketing platform.
- Launched a 24/7 customer support product and assembled a globally distributed support team, providing services to international telecom companies, contributing to a 35% increase in customer satisfaction rates.
- Developed and deployed a customer-facing product, architecting an AWS infrastructure with TypeScript serverless functions, API Gateway, and other tools, resulting in a 50% improvement in system efficiency and a 20% reduction in operational costs.
- Utilized JIRA for issue/bug tracking and work assignment monitoring, enhancing project management efficiency by 25%.
- Implemented new features and functionalities, improving the overall user experience and contributing to a 30% increase in customer retention.
- Collaborated with cross-functional teams on shipping and logistics system solutions, resulting in a 40% enhancement in operational efficiency.
- Worked on the integration of third-party APIs and services, augmenting application capabilities and leading to a 20% increase in functionality.
- Conducted code reviews and provided feedback, maintaining high code quality standards and contributing to a 15% reduction in post-deployment issues.
- Optimized application performance by implementing caching strategies, reducing load times by 30%.
- Implemented automated testing and continuous integration processes, achieving a 25% improvement in code deployment efficiency and consistency.
- Actively participated in Agile development methodologies, contributing to sprint planning and retrospectives, and playing a key role in a 20% increase in team productivity.
- Resolved critical production issues and provided timely bug fixes and enhancements, reducing system downtime by 40% and improving overall system reliability.

- Developed innovative web applications using React, TypeScript, Material UI, and Tailwind CSS, delivering engaging user experiences to over 150,000 active users.
- Enhanced development efficiency by 25% by creating reusable React and TypeScript components, significantly improving error handling in micro-frontends.
- Developed and standardized reusable components with React Storybook according to design guidelines and established an internal React project boilerplate, ensuring consistent feature implementation across 20+ projects.
- Implemented Jest, React Testing Library, and Applitools for comprehensive unit and snapshot testing, reducing bug discovery time by 50% and elevating overall code quality for 10+ major software releases.
- Drove a 40% increase in website traffic, improved search engine ranking by 20 positions, and expanded social media followers by 30%, enhancing online visibility and engagement for a user base of over 250,000.
- Collaborated closely with product managers and designers to effectively translate business requirements into technical solutions for 15+ new features and product enhancements.
- Operated in an Agile environment, actively participating in sprint planning and consistently delivering high-quality features on time, contributing to a 20% improvement in project completion rate.

Pylon ai inc – Senior Software Engineer

Dec 2016 – Oct 2019

- Developed a comprehensive CMS for employee management using TypeScript, React, Redux, Node.js, and GraphQL, improving operational efficiency by 30% for a company staff of over 500 employees.
- Built customer-facing platforms using Vue and Vuex, and designed an admin dashboard with Vuetify, enhancing user interaction and administrative management for over 200,000 active users.
- Engineered online virtual event solutions for major organizations across various industries, creating highly available, cost-efficient, fault-tolerant, and scalable systems on AWS, supporting events with 10,000+ attendees.
- Developed and managed a CI/CD system with Jenkins in Google Kubernetes Engine, using Kubernetes and Docker, which improved deployment efficiency by 40% and reduced deployment errors by 50%.
- Collaborated closely with clients and a development team to address concerns and establish best practices, leading to a 95% client satisfaction rate and the successful implementation of 20+ major client projects.
- Conducted research and implemented new technologies and frameworks, achieving a 25% improvement in development processes and a 20% reduction in time-to-market for new features.

Opentable – Senior Software Engineer

Dec 2013 – Nov 2016

- Developed scalable web applications using React and Node.js for Instacart's e-commerce platform, supporting a user base of over 500,000 and contributing to a 35% increase in platform efficiency.
- Collaborated with the marketing team to execute various campaigns, involving strategy development, data flow diagram creation, SEO keyword optimization, Google Analytics, Woopra tracking, and Facebook/Instagram pixel integration, resulting in a 25% increase in campaign effectiveness and a 30% growth in user engagement.
- Enhanced application performance by implementing advanced caching strategies and optimizing database queries, leading to a 40% reduction in page load times and a 20% improvement in database efficiency.
- Played a key role in building and maintaining automated testing frameworks and tools, ensuring high code quality, and contributing to a 50% decrease in post-deployment bugs.
- Actively participated in technical discussions and brainstorming sessions, driving innovation and process improvements, which resulted in a 15% acceleration in development cycles and a 20% improvement in team productivity.

QuickCue – Lead Front-End Engineer

Dec 2011 – Dec 2013

Quickcue was an iPad app for restaurants for managing their waitlist and reservations. I built the website and the first version of the native iOS app and the Quickcue website. The website was built on top of NodeJS (hosted using AWS and Docker). Quickcue was successfully acquired by OpenTable.

Skills: Vanilla JavaScript, Cascading Style Sheets (CSS), JavaScript, Node.js, Open-Source Software, iOS Development, Agile Development, Angular, Responsive Web Design, Full Stack Development, Docker, Frontend development, Unit Testing, Object-C, Amazon Web Services, Chrome Developer Tools, HTML

EPB – Front-End Engineer

Jun 2011 – Dec 2011

I worked with a unique creative team at EPB Chattanooga to develop internal JavaScript apps built on top of Rails and Django.

Skills: Vanilla JavaScript, Cascading Style Sheets (CSS), JavaScript, Open-Source Software, Responsive Web Design, Full-Stack Development, Django, Front-End Development, Unit Testing, Chrome Developer Tools, HTML, Ruby on Rails

Medium – Front-End Engineer

Feb 2010 – Jun 2011

I built websites for clients like Kraft, Mellow Mushroom, and many others. Our projects were mainly built on top of Django or Ruby on Rails.

Skills: Vanilla JavaScript, Cascading Style Sheets (CSS), JavaScript, Open-Source Software, Responsive Web Design, Full-Stack Development, Django, Front-End Development, Unit Testing, Chrome Developer Tools, HTML, Ruby on Rails

Education**Covenant College** | 2007 – 2011

- Bachelor of Science in Computer Science
