EDUCATION

Computer Science

Yerevan State Uni

📅 Apr 2010 - Apr 2014

📍 San Marcos, Texas

🎓 GPA:3.4/4

Awards

- Bachelor degree

SKILLS

Frontend

- HTML/CSS/JavaScript
- Angular/Angular.JS
- Blazor
- Razor
- React.JS
- Vue.JS
- TypeScript
- Redux/NgRx/Vuex

CSS Frameworks

- Ant Design
- Bootstrap
- Bulma
- Material UI
- Tailwind CSS
- DevExpress
- Syncfusion
- Kendo
- Telerik

Asp.Net Side

- ASP.NET
- ASP.NET Core

CAREER OBJECTIVE

8+ years of experience in Software Application Development. Application development using with C#, WCF, WPF and Winforms. Expert at Frontend frameworks such as React, Angular and Vue.JS. Good Knowledge to web Technologies: ASP.NET, Node.JS, ASP.NET core. Experience with Trello, Github/GitLab, Azure DevOps, Agile and CI/CD. Ability to learn & develop using new technologies quickly. Highly motivated, quick learning team player with good technical skills. Coordinating with the team and with client.

WORK EXPERIENCE

Full Stack Developer

Tesora International

📅 Jul 2020 - Dec 2022

📍 Remote

- Developed frontend using Angular and admin-panel using React
- Used Redux(Thunk) and NgRx for the flex pattern and selected styled
- Added mint, transfer logic with Smart contract base on ERC721 with Solidity using Truffle.beamjobs.com
- Created RESTful endpoints using Asp.net Core Web API and PostgreSQL
- Used FluentValidation, Cronos, Nethereum and Swashbuckle packages for backend development
- Hosted backend using AWS Elastic Beanstalk and set CI/CD on the Azure DevOps.
- Implemented Microservice to the backend and divided backend to 3 main logic layers.
- Implemented SSO using own company's third party API and used OpenId
- Using IPFS and infra for NFT minting and implemented auction, bid, create and offer login in backend
- Developed Restful APIs using Symphony backend and integrated with Vue.js frontend

Full Stack Developer

TePe USA

📅 Nov 2018 - Jun 2020

📍 Remote

- Used React JS for creating reusable UI components and have chosenMaterial UI for CSS styling
- Implemented Auth0 and html2canvas package for the frontend
- Created Menus and Drawer component by using Typescript
- Analyzed code quality and performance with jsHint and YSlow
- Frontend project hosting using DigitalOcean and set CI/CD on the AzureDevOps.
- Implemented Repository pattern to the backend so to maintain code easily.
- Used MS SQL Server and EF 3.1.5 for database management
- Chooosed Repository pattern for development and follow SDLC pattern
- Implemented Swashbuckle nuget package for SwaggerUI for API
- Using GraphQL and used xUnit and nUnit for test case and follow the SDLC pattern.

- ASP.NET Web API
- ASP.NET MVC
- Blazor Server App
- Blazor Web Assembly

Backend

- Asp.Net
- Node.JS
- Laravel
- Django
- Spring Boot

Database

- Firebase
- MS SQL Server
- Mongo DB
- MySQL
- Oracle
- PostgreSQL

Desktop Application

- Windows Forms
- WPF
- MAUI
- UWP

Mobile Application

- Java/Kotlin
- Flutter
- React Native
- Swift

Blockchain

- Cryptocurrency
- Ethereum
- NFTs
- Smart Contracts
- Solidity

Game Development

- Cocos
- Unity
- Play2Earn

Nuget Package

- AutoMapper

ASP.NET Core Developer

Let's Use Data

📅 Apr 2017 - Oct 2018 📍 Remote

- Developed frontend with using Html/CSS/JavaScript, JQuery and Bootstrap
- Developed backend using ASP.NET core and use Entity framework for database control.
- Developed many compilers using C# like C# compiler, Excel compiler, Java Compiler and so on.
- Implementd CI/CD on the Azure DevOps and used OpenId and Microsoft
- Google SSO with JWT token.
- Used Entity framework core and MS SQL Server and used SwashBuckle
- FluentValidation, AutoMapper Nuget packages
- Implementd Domain Driven Design Pattern and SendGrid, Twilio SMS and Google Maps APIs.

ASP.NET MVC Developer

Bell Boy Room Service

📅 Apr 2015 - Feb 2017 📍 Remote

- Developed frontend using Angular, HTML/CSS/JavaScript and JQuery.
- Used code-first design pattern and EF6.0, Firebase, MS SQL Server for database management.
- Implemented real time chat server for chat and used MVVM pattern for backend development.
- Used repository pattern for backend development and used LINQ.
- Used Twilio, Smtip nuget package for client service and swashbuckle
- Integrated Payment process with bank account and used Repository
- Followed SDLC for development and xUnit, nUnit for test cases.
- Divided backend into 3 logic layers so users can use backend easily.
- Used Twilio package for sending SMS and LinqToExcel, Syncfusion UI for the document printing.

NET Developer

Dorm Mom

📅 Sep 2014 - Feb 2015 📍 Remote

- Developed frontend with using Angular, Html/CSS/Bootstrap and JQuery and all API requests are called by Ajax
- Chooosed MS SQL server and Entity framework core for database control
- Developed backend using Asp.Net MVC and fixed frontend bugs.
- Integrated payment processing such as Paypal, Stripe.
- Use Jira for development and use Github for source control
- Used Mailchimp and SendGrid for client's performance
- Upgrade .Net Versions and nuget packages.
- Implemented SSO such as Google Auth, Facebook oauth, Apple auth and Twitter auth.
- Launched project successfully and earn \$1M per year.

- Cronos
- FluentValidation
- xUnit
- LINQ
- Nethereum
- Swashbuckle
- JwtBearer
- OpenIdConnect
- Npgsql
- EntityFramework
- EntityFramework Core
- LiteDB
- MongoDB
- Stripe
- SendGrid
- GoogleMaps API
- Twilio
- Signal R

CI/CD

- AWS Service
- Azure DevOps
- Bitbucket
- cPanel
- Docker
- Digital Ocean
- Jira
- Github
- Gitlab
- GCP
- Trello

PROJECTS

Tesora International

Full Stack Developer

📅 Jul 2020 - Dec 2022

- Implemented microservice to the backend and used Npgsql for postgresQL database.
- <https://github.com/TopTen1004/Tesora-Backend>
- Developed frontend using React, Redux(Thunk), Ngrx(Rxjs) and Styled Components.
- <https://github.com/TopTen1004/Tesora-Frontend>
- This is my latest ASP.NET Core web API endpoints hosted on AWS.
- <http://nftdatabase-dev.us-west-2.elasticbeanstalk.com/swagger/index.html>

TePe USA

Full Stack Developer

📅 Nov 2018 - Jun 2020

- Developed backend using Repository pattern and implemented Code First, Domain Driven Design, T-SQL.
- <https://github.com/TopTen1004/TePe-API>
- Developed frontend using React(TypeScript), Material UI, Redux, Hooks and WireFrame to control the canvas.
- <https://github.com/TopTen1004/TePe-Frontend>

Bell Boy Room Service

Asp.Net MVC Developer

📅 Apr 2015 - Feb 2017

- Used Asp.Net MVC and Asp.Net web api for the project, implemented microservice.
- <https://github.com/TopTen1004/App-Bell-Boy>
