EDUCATION

Bachelor degree

The University of Texas

📅 April 2010 - April 2014

SKILLS

Front End

- HTML/CSS/JavaScript/Bootstrap
- Angular/AngularJS
- Blazor
- ReactJS
- VueJS
- TypeScript
- Redux/NgRx/Vuex

CSS Frameworks

- Ant Design
- Bootstrap
- Material UI
- Tailwind CSS

Database

- Firebase
- MS SQL Server
- Mongo DB
- MySQL
- Oracle
- PostgreSQL

SUMMARY

5+ years of experience in Software Application Development.
Application development using with C#, Web Forms in ASP.NET.
Expert at Frontend frameworks such as React, Angular and Vue.JS.
Good Knowledge to web Technologies: ASP.NET, Node.JS, ASP.NET core.
Experience with Trello, Github/GitLab, Azure Dev, Agile and CI/CD.
Ability to learn & develop using new technologies quickly.
Highly motivated, quick learning team player with good technical skills.
Working individually and contributing with in team.
Coordinating with the team and with client.

WORK EXPERIENCE

Full Stack Developer

Tesora Financial

📅 Jul 2021 - Dec 2022

📍 Remote

- Developed frontend using React.
- Used Redux(Thunk) for flex pattern.
- Used styled components and Material UI for styling.
- Developed smart contracts with Solidity based on ERC721.
- Implemented mint, transfer logic with Smart contract in Solidity.
- Used Asp.Net core for backend.
- Use PostgreSQL and host it on the AWS service.
- Use FluentValidation, Cronos, Nethereum and Swashbuckle packages.
- Host backend using AWS Elastic Beanstalk.
- Developed admin-frontend using Angular.
- Implemented Login with OpenApi and OpenId.
- Using IPFS and infra for NFT minting.
- Implemented auction, bid, create and offer login in backend.

Full Stack Developer

Tepe

📅 Nov 2020 - Jun 2021

📍 Remote

- Use React/Type Script for frontend.
- Auth0 npm package for authenticate.
- Use html2canvas npm for control the images.
- Use Material UI for CSS styling.
- Used React JS for creating reusable UI components.
- Created Menus and Drawer component by using Typescript.
- Analyzed code quality and performance with jsHint and YSlow.
- Frontend project hosting using DigitalOcean.
- Developed backend API using Asp.Net core web API.
- Use MS SQL Server for database management.
- Use EF6.0 for database control.
- Choose Repository pattern for development.
- Use AutoMapper Nuget package to match Model and ViewModel.
- Swashbuckle nuget package for Swagger UI.

Server Side

- ASP.NET
- ASP.NET Core
- ASP.NET Web API
- ASP.NET MVC
- Blazor Server App

CI/CD

- AWS Service
- Azure DevOps
- Bitbucket
- Docker
- Jira
- Github
- Gitlab
- GCP

Nuget Package

- AutoMapper
- Cronos
- FluentValidation
- NUnit
- Linq
- Nethereum
- Swashbuckle
- JwtBearer
- OpenIdConnect
- Npgsql
- EntityFramework
- EntityFramework Core
- LiteDB
- MongoDB
- Stripe
- GoogleMapsApi
- Twilio

ASP.NET Core Developer

Let's Use Data

📅 Apr 2018 - Oct 2020 📍 Remote

- Understand business goal of this project.
- Developed frontend with using Angular, Html/CSS, JQuery and Bootstrap.
- Developed backend using ASP.NET core and use Entity framework for database control.
- Use MySQL server for database and wrote code for database design
- Developed many compilers using C# like C# compiler, Excel compiler, Java Compiler and so on.
- Use Azure DevOps for source control.
- Use OpenId and Microsoft, Google SSO with JWT token.
- Use Entity framework core for database control.
- Use SwashBuckle, FluentValidation, AutoMapper Nuget packages.
- Use Domain Driven Design Pattern.
- Used SendGrid, Twilio SMS services.

NET Developer

Bell Boy System

📅 Apr 2016 - Feb 2018 📍 Remote

- Developed frontend using Angular, HTML/CSS/JavaScript.
- Use Asp.net for backend development.
- Processed request and response with using ajax.
- Used code-first design pattern.
- Use EF6.0, Firebase, MS SQL Server for database management.
- Used real time chat server for chat
- Used MVVM pattern for backend development.
- Used repository pattern for backend development.
- Created more than 10 services.
- Used Twilio, Smtip nuget package for client service.
- Swashbuckle package for API development.

NET Developer

Dorm Mom

📅 Sep 2014 - Feb 2016 📍 Remote

- Developed frontend with using Angular, Html/CSS/Bootstrap and JQuery
- All API requests are called by Ajax.
- Use MySQL server for database and wrote code for database design
- Developed backend using Asp.net core with .Net version 5.1.
- Integrated payment processing.
- Use Azure DevOps for development and use github for source control.
- Implemented SSO such as google auth, facebook oauth, apple auth and twitter auth.
- Use Entity framework core for database control.
- Use Mailchimp and SendGrid for client's performance.
- Upgrade .Net Versions and nuget packages.
