3. Employment History

Game Developer, [Virtuos](#) , Beijing

Nov 2015 – Nov 2016

I have worked as a Game Developer in this Company.

This is my first company. I worked as an assistant in this company.

I did small parts of this company's game 'Dark and Soul'. I usually added items and weapons to the game and set the item properties like swords, shield and arrow in the project.

Game Developer, [EivaaGames](#), Pune

Dec 2016 – Feb 2018

I have worked as a Game Developer in this company.

I took part in the Billiard Game projects, because I am fan of Billiard.

My major role was calculate the power of the mouse click and made user interface more familiar. I used NGUI package in user interface. I used physics simulation in details like power, angle, reaction and so on.

Game Developer, [Battlestate Games](#), London

Mar 2018 – Nov 2019

I have worked as a Game Developer in this company. I selected this company because my first company was FPS game company.

My work was to upgrade 'escape from tarkov's unity version from 2018 to 2019.

Because version 2019 has more effects than version 2018. I added lighting and shaderUtils to the game objects like environment. And I also fixed some bugs in C# script.

Game Developer, [Xtreme Games Studio](#), California

Nov 2019 – Oct 2020

I have worked as a Game Developer in this company. I took part in the Real Cars Extreme Racing project. I worked in a customize vehicle part. I developed choose

to paint car with nice car skins and customize wheel rims and get to drive in style. And I gave more detail properties to the cars. I added 2 locations to the game project. Made user interface more familiar to the clients.

Game Developer, [Anifie](#), Irvine

Nov 2020 – Apr 2021

I worked as a Game Developer in this Company. My major role was Unity Developer and NFT Metaverse Unity Developer. I developed APIs, implement SDKs and Unity features. I also helped optimize our tools, pipelines, shaders, texture resolutions and art works. I gave useful feedbacks to the other developers and respect team members.

Project Manager, [Earth Labs NFTs](#), New York

May 2021 – Apr 2022

I worked as a Project Manager in this company. I controlled Unity Game Project. It was a style fighting video game and I implemented the game scenario and game design. I was proto type the C# script and web3. I integrated web3 to the Unity Game Project. Also I optimized the project and developed the game server with C. I used Google Protobuf in communication.
