WORK EXPERIENCE

Oneplay

2022.7 – 2022.8

Golang Developer

- I've taken part in development of a part of game cloud platform service for decentralized game play.
- I've developed a game signaling server for connections between host and game players using websocket in Golang.
- I've customized Sunshine for transferring game play data from host computer in C/C++ and video encoding algorithm.
- I've developed webRTC Proxy part that using gRPC in Golang to convert RTP to webRTC packet type.

Gad.ai, Atlanta, United States

2022.3 – 2022.7

Senior Mobile | Golang Backend Developer

- I have developed mobile apps on MacOS environment.
- I have developed front-end parts of mobile apps with React-Native and back-end parts with Golang, Ruby on Rails and Node.js.
- I have developed several backend servers and microservices of several mobile apps and websites and big enterprises in Golang framework Gin.
- I have been responsible for deployment of completed projects to app store and working with clients.

Lukka, New York, United States

2020.9 – 2022.3

Blockchain and Backend Engineer

- Participated in developments of NFT marketplace protocol like Opensea.
- Developed smart contracts and backend in Rust and Go.
- Performed technical designs and implementation of NFT games.
- Improved product quality through code reviews, writing effective unit tests and collaborating with QA on implementing automation testing.
- Developed microservices for financial platform using Golang microframework Gin

Servallt, Novi Sad, Serbia

2018.10 – 2020.9

Backend Developer

- Had grown skills while working with senior web backend engineers and experienced in Ruby, Python, Golang and Rust.
- Taken part in large-scale web applications and had been responsible for backend development in Python and Go.
- Worked closely with backend developers to build RESTful APIs and microservices for big enterprises.
- Had developed websites using Ruby on Rails for backend and React for frontend.

AROBS, Cluj-Napoca, Romania

2017.1 – 2018.10

Junior Full-Stack Web Developer

- Utilized and implemented 7+ attractive, responsive, and mobile-friendly website contexts and elements.
- Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience.
- Worked with backend developers to build RESTful APIs.
- Had learnt a lot from senior engineers about backend engineering with developing large-scale projects in Python and Go.

OBJECTIVE

Organized, collaborative, and highly skilled Full stack developer with 6+ years of professional experience with web back-end and front-end development and microservices in dynamic and deadline-driven work environments. Eager to join an excellent development team to delight its customers with magical experiences and in another hand for skill and career grows. In previous roles developed web and mobile applications and microservices.

SKILL HIGHLIGHTS

Programming Languages

- Rust, Go, Python, Ruby, Solidity, JavaScript, TypeScript

Web & Mobile Technologies

- React/Redux, React-Native
- Beego, Gin, Martini, Node.js, Express.js, Django, Ruby on Rails, Flask

Databases

- PostgreSQL, MongoDB, GraphQL, RESTful API, gRPC

Blockchain Technologies

- NFT marketplaces, NFT games
- Contract development with Solidity and integrating using Web3 libraries.
