Abdo Elsaid

Passionate cryptocurrency trader and blockchain technology enthusiast with a deep focus on emerging tokens and market opportunities.

Benha, Al Qalyubiyah, Egypt

Experience

Looter.AI

Blockchain Developer

August 2024 - Present (1 year 3 months)

London

- Recognized the enduring appeal of meme coin trading as a cultural phenomenon driven by human psychology-the innate desire for high-stakes speculation and the dream of achieving billionaire status through calculated risks.
- Drawing on my deep understanding of market behaviors and consumer motivations, I envisioned a sophisticated trading bot optimized for the Solana blockchain, chosen for its superior speed, security, and low transaction costs compared to other networks.
- Under my strategic guidance, the team developed and successfully launched this innovative bot, integrated with our proprietary meme token, enabling seamless, automated trading that capitalizes on volatile market trends.
- Through targeted marketing campaigns and community engagement, we amplified its adoption, generating substantial revenue streams and establishing Looter as a leader in decentralized finance tools.
- This accomplishment highlights my ability to blend visionary insight with practical execution, fostering collaborative teams to deliver high-impact solutions that resonate with global audiences and drive sustainable growth in the crypto ecosystem.

HENO

DevOps Engineer

June 2025 - Present (5 months)

London Area, United Kingdom

Sonata

Web3/Frontend Engineer

October 2023 - October 2025 (2 years 1 month)
