Telecommunications, Communications

- Satellite Communications
- Fiber Optic Communications
- Fixed Communications
- Mobile Communications

Senior PHP Developer

Multi-vendor marketplaces were created using Laravel microservices, which resolved issues with high concurrency and order tracking.

Russian payment systems and logistics APIs were integrated, ensuring seamless order processing and delivery.

Refactoring legacy systems using Yii increased performance and reduced downtime during seasonal sales.

React-based storefronts were implemented, improving the user experience and increasing conversion rates.

Scalability workshops were held, resulting in a 25% increase in uptime.

Further information

About me	An experienced senior PHP developer with over 5 years of experience building scalable, secure, and high-performance web applications. I am proficient in modern PHP frameworks such as Laravel and Symfony, and have extensive experience in object-oriented programming and API development. I am skilled at collaborating with cross-functional teams to deliver complex projects on time, mentoring junior developers, and promoting best programming practices. Experience in database design and optimization, particularly MySQL and PostgreSQL, ensures efficient data processing in enterprise-class systems. I am skilled in integrating third-party services, cloud platforms, and microservices architecture to improve application functionality. I am known for my problem-solving skills, attention to detail, and passion for writing clean, maintainable code. I strive for continuous learning and staying up-to-date with new technologies to drive innovation and business success.
