
Denis Lee

Blockchain Developer

Overview

I'm a Blockchain engineer specialized in solidity smart contract development. I have been contributing to contract development and protocol design for several Defi, NFT, Gamify, and DAO projects. I mainly worked as a solidity developer, but also have good experience with working as a dev team lead, tech advisor, protocol and tokenomics designer. I always love to learn new things and wanna grow experience in L2 technologies now.

EXPERIENCE

DropsDAO - Blockchain Developer

Jan 2022 - May 2022 (Full-time)

- Lead oracle development for collateral NFTs.
- Contributed to NFT lending protocol contract development.
- Wrote VE lock and balance NFT contracts.

Tokemak — Solidity Developer

Aug 2021 - Dec 2021 (Full-time)

- Developed contracts for Defi liquidity management and direction protocol.
- Responsible for designing reward systems and Pool contracts.

Warp Finance — Solidity Team Lead

Mar 2020 - Aug 2021 (Full-time)

- Designed V2 lending protocol with isolated pair, single vault, liquidity management, VE lock, and price oracle contracts.
- Designed tokenomics for team token and its utility functionalities.
- Lead solidity development team of 3 other members.

ElastOS — Tech Advisor

Jan 2020 - Mar 2020 (Part-time)

- Worked as a tech advisor and part-time contributor for contracts development on the side-chain of ElastOS network.
- Also contributed to Hive Node and DID package development.

Fantom — Blockchain Developer

May 2018 - Mar 2020 (Full-time)

- Worked on dApp projects on Fantom network as full-stack engineer.
- Contributed to Arton NFT marketplace contract development.

Shopee — Full-Stack Developer

Apr 2012 - May 2018 (Full-time)

- Developed a financial report analysis platform that processes over 1M reports using AI and OCR technology

EDUCATION

Nanyang Technological University (Singapore) - Bachelor's Degree

2008 - 2011

SKILLS

- Solidity, Openzeppelin, Proxy & Upgradable, Gas optimizing
- Ethereum & EVM compatible networks, Cosmos, StarkNet
- Defi protocols like lend, borrow, stack, yield farming, AMM
- NFT, Gamify, DAO, MetaVerse, Governance, Oracle, Chainlink
- Web3, Ether.js, TheGraph, Waffle.js, JavaScript, TypeScript, Node, Python, Git, AWS, Docker, Cairo
