

Denis Lysyi

Full Stack Developer

Summary of Qualifications

I am a full stack developer with 5,5 years of experience in the industry. I have been working with various programming languages and technologies, and know how to communicate with the customers, work with requirements, create technical specifications, develop an MVP and know how to code, design, fix bugs, monitor, update and support.

The main technologies which I used in my previous projects were Python, Angular, React, SQL, JS, Linux, AWS. Methodologies - Scrum, Agile.

I'm a good team player, responsible and I'm interested in writing clear readable code.

Skills

Programming Languages/Technologies

- Software Architecture Design/UML/ Reverse Engineering/Design Patterns
- Technical Documentation/Architecture Reports/Proposals/SRS
- JavaScript/TypeScript
- XML/JSON/YAML
- Python
- HTML/CSS/LESS/Sass
- SQL/NoSQL

RDBMS

- MySQL
- PostgreSQL

NoSQL

- MongoDB
- Elasticsearch
- GraphQL
- Neo4j

Virtualization Tools

- Docker

Methodologies

- Agile, Scrum
- Pair Programming
- Test Driven, Feature Driven, Behavior Driven Development
- Waterfall

Operating Systems

- Microsoft Windows
- SUSE Linux
- macOS

Testing Tools

- Postman

Frameworks/Libraries

- NumPy/Pandas
- Django
- Jinja2
- FastApi
- SQLAlchemy
- Flask
- pip
- Selenium
- Scrapy
- BS4
- Pillow
- Requests
- Matplotlib
- Scikit Learn
- TensorFlow
- Keras
- Plotly
- PyTest
- WebSockets
- PyQt
- Tkinter

Application/Web Servers

- Apache
- Nginx

Cloud Providers

- AWS

Development Tools

- IntelliJ IDEA
- Visual Studio
- PyCharm

Hardware

- Network technologies
- Hardware over clocking
- Different technological device

Experience

Platform for secure storage of databases and datasets

Project Description: Data can be downloaded as a link, CSV or SQL dump file. Dataset automatically maps each data-field to our categories of info types, including sensitive data and PII. Fields are contextualized with metadata, such as identifiability, sensitivity, quasi/direct identifier, etc. User can manually adjust the auto-mapped Information type and add tags, name, etc.

Customer: French company

Involvement Duration: 1,5 year

Project Role: Full Stack Developer

Responsibilities:

- Preparing technical specification;
- Code development;
- Unit testing;
- UI/UX improvements;
- Bug fixing;
- Product support and documentation maintenance.

Project Team Size: 10-12 team members

Tools & Technologies: Python 3.9, Flask, SQLAlchemy, TypeScript, Angular, AWS, PostgreSQL, Docker, HTML/CSS

Web application for logistics in salesforce

Project Description: The company provides clients with logistics for the salesforce platform.

Customer: UK company

Involvement Duration: 1 year

Project Role: Full Stack Developer

Responsibilities:

- Improving system architecture;
- Developing and maintaining standardized shipping carrier API and admin panel;
- Adding new integrations;
- Bug fixing;
- Code development;
- Unit testing;
- UI/UX improvements.

Project Team Size: 6-8 team members

Tools & Technologies: Python 3.7, webapp2, alembic, pytest; PostgreSQL; Celery; Docker; Heroku; Postman; JSON, XML, SOAP/WSDL.

Platform for educational institutions

Project Description: The platform is designed for use by teachers, administrators and parents to systematize the learning process and its payment.

Customer: US company

Involvement Duration: 1,5 years

Project Role: Developer

Responsibilities:

- Code development;
- System architecture;
- Development, build and deployment scripts;
- API integrations with 3rd parties;
- UI/UX improvements;
- Bug fixing;
- Unit testing.

Project Team Size: 13-15 team members

Tools & Technologies:	Python 3.8, FastAPI, SQLAlchemy, Alembic, pytest; PostgreSQL; Nginx; CentOS; Keycloak; JS, TypeScript, ReactJS
Project Description:	Exchange service for crypto market A copy of localbitcoins.com solution, multi-coin exchange (Bitcoin, Dash, Ethereum, etc.) which included the escrow service, wallet interface, etc.
Customer:	Australian company
Involvement Duration:	1 year
Project Role:	Python Developer
Responsibilities:	▪ Integration with multiple coins blockchain; ▪ Code development; ▪ Unit testing; ▪ Development, build and deployment scripts; ▪ Product support and documentation maintenance.
Project Team Size:	4-6 team members
Tools & Technologies:	HTML/CSS, JS, AngularJS; Python 2, Twisted, Klein, Peewee; Bitcoin, Ethereum, Dash, BitcoinCash; MySQL; Nginx.

Certifications	Python Advanced 
-----------------------	--

Education	Bachelor's degree Interregional Academy of Personnel Management, Odessa Computer Science
