Profile

I am a full stack (Front-end and Back-end) Developer who is passionate in creating fast, consistent, error-free solutions that impress and aid clients in their online needs. I push myself to create high quality work while keeping an eye for the most minute details to ensure a product that won't fail.

Also I have 6+ years of experience with proficiency in NFT Marketplace | Smart Contract Development | Blockchain Development | ICO | Cryptocurrency | Smart Contract Audits | Public & Private Blockchain | DApps.

Like everyone who loves programming, I find my pleasure in creating beneficial & convenient systems giving clients 100% satisfaction.

I think I am a motivated programmer who thinks of clients first.

Any program that clients do not welcome, even if well written and organized, is just a bit of code.

My only passion is programming.
