WORK EXPERIENCE

Software Engineer

Advanced Blockchain AG

03/2020 - 04/2022

Advanced Blockchain AG is a publicly listed investor, incubator, and partner in the blockchain industry

Achievements/Tasks

- Built a microservice-based backend for providing the most reliable API ecosystem with continuous NFT scrapping and syncing on EVM chains.
- Implemented and deployed the graph for staking contract tracking all events and allowing more advanced queries.
- Implemented ERC721A to mint batch NFT tokens with saving gas fees.
- Integrated the smart contract for NFT, NFT Marketplace, Staking, Farming, Voting, Exchange using Web3 and React.
- Customized Metamask UI and logic to add different sub-chains in one network.

Blockchain Engineer

Privi Protocol

02/2018 - 03/2020

Achievements/Tasks

- Created and deployed staking, farming, voting, swap contract for the EVM token using Solidity and Hardhat.
- Explored atomic swap between two or more Fabric networks.
- Built NFT, NFT Marketplace, Auction, Airdrop smart contracts on almost of EVM chains and Polkadot chain by using Solidity and Rust.
- Worked in the smart contract audit team and reviewed the contracts.

Front-End Developer

Morpheus Labs

04/2015 - 01/2018

Achievements/Tasks

- Built a poster automation tool using React, Node.js, PHP, Imagemagic and Python for UTProducts, and helped the client to raise \$1M in their seed round.
- Participated in admin dashboard management development which involves TypeScript(React/Redux/Axios), HTML, TailwindCSS and more.
- Executed the strategy laid out by project manager and built the core front-end architecture of a twitter-like social media platform for worldwide gamers.

EDUCATION

Singapore Institute of Technology Computer Science

2010 - 2014

SKILLS

Harhat Truffle React/Redux

Vue/Vuex Web3 Nodejs

Laravel Moralis TheGraph

Express Solidity JavaScript

TypeScript HTML TailwindCSS

MaterialUI Styled-component

AWS Docker Git MongoDB

MySQL PostgreSQL

ADDITIONAL

Software Engineer

BlueHorizon

NFT platform for **ARTISTS** and **COLLECTORS**

Tasks/Achievements

- Customized and Integrated PancakeSwap.
- Deployed ERC1155 token contract and used IPFS to upload token metadata.
- Wrote Moralis Cloud Script to fetch event data.

Front-End Developer

GamerOne

Gamer One is an esports and gaming community that helps aspiring and professional gamers and teams.

Tasks/Achievements

- Built dialog and card based component using React and TypeScript.
- Set up a real-time notification system for follow, unfollow, likes, dislikes and post a blog status.
