Summary

Senior Software Engineer with 9+ years of rich experience.

- Professional, skilled senior full-stack software engineer with 7 years of experience implementing high performance & quality code, bug free product and fast development speed.
- Experience in MERN, MEAN, MEVN stack, Laravel, Go programming, cross-platform responsive pixel-perfect UI, third party API integration.
- Fast problem-solving speed, critical productive thinking, fast learner and great communication skill.

Experience

HealthSherpa | San Francisco, California

Technical Leader | 08/2019 - 10/2022

- Created a new front-end app based on React and Redux.
- Used HOC for form manipulation.
- Worked with legacy code on the server side, able to understand the principles behind it and make it work again.
- Designed a MongoDB database.
- Developed software using RESTful APIs with Node.js and Express.js.
- Designed and implemented a response management software-as-a-service system for HR professionals.

Friendemic | Salt Lake City, Utah

Senior Backend Engineer | 04/2017 - 08/2019

- Implemented a RESTful API to securely allow custom-made clients to traffic data in JSON/XML.
- Set up the automatic generation of documentation for the API endpoints, database types, and integrated external APIs based on JSON schema models.
- Served the endpoints using the Express.js library.
- Supported a back-end system with a heavy load, as well as participated in the modeling of a new and improved version of the entire system.
- Improved the performance of the system with Elasticsearch.
- Developed tools in Go to support internal teams and for CI/CD.
- Build a Go-based web spider to support the ad-tech safety platform of the organization.

Holidu | Riesstrasse, Munchen

Senior Front End Engineer | 09/2015 - 02/2017

- Designed the application architecture on TypeScript, React, and Redux.
- Implemented pixel-perfect design using vertical alignments.
- Led the front-end developers—doing code reviews to achieve maintainable and high-quality code.
- Created a React front-end admin dashboard for complex table data visualization with user-friendly search features.
- Developed a React, React hook, and Material UI front-end web application for a real estate tax calculation.
- Developed unit tests and component snapshot tests using Jest.
- Wrote a performance monitoring library to use performance counters for measuring front-end delivery and back-end service responses.

BRUCE CLAY JAPAN INC | Tokyo, Tokyo

Web Developer | 11/2013 - 09/2015

- Built a front-end widget that is added as a single external script to an HTML page but works as a big library using vanilla JavaScript and jQuery.
- Implemented a web scrapping and browser controlling app for automated management of sites using Puppeteer and Apify.
- Optimized the front-end portion to make a fully functional and performant website using Webpack and many other compressing tools like JPEGmini.
- Integrated Elasticsearch with the existing MySQL for better database handling and performant querying.
- Implemented a real-time chatting platform-building AI-based chatbot with Socket.IO and Dialogflow.
- Worked on OOP languages including Python for the first time.

Skills

React.js, Vue.js, AngularJS, Express.js, Node.js, Laravel, Ionic, React Native, Restful API, Pixel-Perfect UX/UI, JavaScript, TypeScript, PHP, Golang, Python, LESS/SaSS/SCSS, HTML5/CSS, Agile, Jenkins, Jira, GitHub

Education

New York University | New York, New York

Information Technology | 09/2013

Bachelor's degree of Computer Science
