Dedicated, collaborative and highly skilled backend engineer with 5+ years of professional experience in web and mobile app backend & frontend development and microservice development in dynamic and deadline- driven work environments. Eager to join an excellent development team to delight its customers with magical experiences and in another hand for skill and career grows. In previous roles, successfully developed and deployed several web, mobile apps and microservices.

Work Experience

Golang Developer

ConcertAI (MindTree - Agency) - Cambridge, MA
November 2019 to Present

- Wrote data APIs and multi-server applications to meet product needs using Golang.
- Designed configurable REST APIs on demand using Go. Worked on numerous go frameworks like Gin, Chi, Gorilla-Mux, Revel and Beego.
- Developed all the applications in Go in Linux platform.
- Worked on CI/CD tool Jenkins to automate the build process from version control tool into testing and production environment.
- Developed a remote game play system using gRPC in Golang.
- Created Docker image for microservices files to orchestrate applications using Kubernetes.
- Proficiency in multiple databases like MongoDB, PostgreSQL, MySQL.
- Used tools such as Git, Jira, Slack for version control, bug tracking and communication respectively.
- Developed 4+ mobile apps using React-Native for building UIs, Go framework Gin and Gorilla/Mux, Python framework Django and Ruby on Rails, Node.js/Express for building RESTful APIs, Google Firebase, MongoDB, PostgreSQL.
- Developed protocols and services of high-proficient trading bot using Rust and customized Go-Ethereum to increase scalability of bot.

Backend Developer

10Pearls (MindTree) - Vienna, VA
September 2017 to November 2019

- Worked with a team of 5+ developers to create an API for mobile, web apps and big enterprises to support the collaboration between several large departments.
- Developed server-side software modules and client-side user interface components deployed entirely in Compute Cloud of Amazon Web Services and Google Cloud Platform.
- Developed new RESTful API services that work as a middleware between applications and third-party APIs that will be used in further projects using Golang.
- Developed smart contracts of NFT, DeFi, DEX projects in Solidity and built UIs using React framework in TypeScript, JavaScript and integrated contract using Web3 libraries.

- Developed backend part of a caching platform in pure Rust.
- Developed 3+ microservices for Fintech in pure PHP and Go, using PostgreSQL as a database, Docker, Kubernetes, G-Cloud to deploy apps to cloud services.

Backend Developer

Andersen - New York, NY

January 2017 to September 2017

- Developed and maintained software applications according to specifications provided by senior developers.
- Participated in code reviews to ensure that all code meets company standards for quality and security.
- Debugged and resolved technical issues with software applications.
- Improved existing RESTful APIs by adding more functionality and error handling capabilities.
- Collaborated with 6+ Golang developers on open source projects in GitHub repositories.
- Migrated Node.js source to Golang code in 5+ projects to improve scalability, stability and capability and made it 7 times faster than before in backend parts.

Junior Developer

TrialCard, Inc - Morrisville, NC

April 2016 to December 2016

- Took part in Designing rich user interface applications using JavaScript, jQuery, CSS, HTML and AJAX.
- Created and maintained the Admin page for central management of the application using React for frontend and Node.js for backend.
- Designed complex databases and generated optimized sql queries to fetch necessary data for the medical business.
- Developed microservices for medical business in PHP and used MySQL as a database.

Education

Bachelor's Degree in Computer Science

Hong Kong, The University of Hong Kong - Hong Kong

May 2013 to April 2016

Skills

- Golang Rust
Backend Backend
Python Ruby / Ruby on Rails
Backend Backend / Full Stack
Node.js React / React Native
Backend Frontend
Docker / Kubernetes AWS / GCP
Jenkins / GitLab / Bamboo Windows / Linux / Mac
DevOps / CICD
Team-Work, Communication
MongoDB / PostgreSQL / MySQL
Languages
English Chinese Japanese
C1 A2 A2
- Go
- Rust
- Python

- Ruby on Rails
- Back-end development
- Node.js
- React
- React Native
- Docker
- Kubernetes
- Jenkins
- GitLab
- Bamboo
- Linux
- Windows
- Mac OS
- MySQL
- MongoDB
- PostgreSQL

Languages

- English - Expert
- Chinese - Beginner
