Summary

Dedicated, collaborative and highly skilled backend engineer with 5+ years of professional experience in web and mobile app backend & frontend development and microservice development in dynamic and deadline-driven work environments. Eager to join an excellent development team to delight its customers with magical experiences and in another hand for skill and career grows. In previous roles, successfully developed and deployed several web, mobile apps and microservices.

Skills

Golang <i>Backend</i>	● ● ● ● ●	Rust <i>Backend</i>	● ● ● ● ●
Python <i>Backend</i>	● ● ● ● ●	Ruby / Ruby on Rails <i>Backend / Full Stack</i>	● ● ● ● ●
Node.js <i>Backend</i>	● ● ● ● ●	React / React Native <i>Frontend</i>	● ● ● ● ●
Docker / Kubernetes	● ● ● ● ●	AWS / GCP	● ● ● ● ●
Jenkins / GitLab / Bamboo <i>DevOps / CICD</i>	● ● ● ● ●	Windows / Linux / Mac	● ● ● ● ●
MongoDB / PostgreSQL / MySQL	● ● ● ● ●	Team-Work, Communication	● ● ● ● ●

Languages

English
C1

Education

05/2013 – 04/2016
Hong Kong,
Hong Kong

Bachelor's Degree / Computer Science
The University of Hong Kong

Professional Experience

11/2019 – present
Cambridge,
Massachusetts,
United States

Golang Developer

ConcertAI (MindTree - Agency) 

- Using GO, developed a microservice for reading millions of data from PostgreSQL database.
- Wrote data APIs and multi-server applications to meet product needs using Golang.
- Designed configurable REST APIs on demand using Go. Worked on numerous go frameworks like Gin, Chi, Gorilla-Mux, Revel and Beego.
- Developed all the applications in Go in Linux platform.
- Worked on CI/CD tool Jenkins to automate the build process from version control tool into testing and production environment.
- Developed a remote game play system using gRPC in Golang.
- Created Docker image for microservices files to orchestrate applications using Kubernetes.
- Proficiency in multiple databases like MongoDB, PostgreSQL, MySQL.
- Used tools such as Git, Jira, Slack for version control, bug tracking and communication respectively.
- Developed 4+ mobile apps using React-Native for building UIs, Go framework Gin and Gorilla/Mux, Python framework Django, Flask and FastAPI and Ruby on Rails, Node.js/Express for building RESTful APIs, Google Firebase, MongoDB, PostgreSQL.
- Developed protocols and services of high-proficient trading bot using Rust and customized Go-Ethereum to increase scalability of bot.

09/2017 – 11/2019
Veinna, Verginia,
United States

Backend Developer

10Pearls (MindTree) 

- Worked with a team of 5+ developers to create an API for mobile, web apps and big enterprises to support the collaboration between several large departments.
- Effectively used Goroutines and channels to build more scalable APIs.
- Developed server-side software modules and client-side user interface components deployed entirely in Compute Cloud of Amazon Web Services and Google Cloud Platform.
- Worked with AWS Lambdas, EC2, S3 bucket.
- Developed new RESTful API services that work as a middleware between applications and third-party APIs that will be used in further projects using Golang.
- Used Go CPU and memory profiling tools to build more scalable, stable and extensive applications.
- Developed smart contracts of NFT, DeFi, DEX projects in Solidity and built UIs using React framework in TypeScript, JavaScript and integrated contract using Web3 libraries.
- Developed backend part of a cashing platform in pure Rust.
- Developed 3+ microservices for Fintech in pure PHP and Go, using PostgreSQL as a database, Docker, Kubernetes, G-Cloud to deploy apps to cloud services.

01/2017 – 09/2017
New York, New York,
United States.

Backend Developer

Andersen (MindTree) 

- Developed and maintained software applications according to specifications provided by senior developers.
- Participated in code reviews to ensure that all code meets company standards for quality and security.
- Debugged and resolved technical issues with software applications.
- Improved existing RESTful APIs by adding more functionality and error handling capabilities.
- Collaborated with 6+ Golang developers on open source projects in GitHub repositories.

- Developed a betting and travelling platform using React/Redux for frontend and Node.js for backend.
- Migrated Node.js source to Golang code in 5+ projects to improve scalability, stability and capability and made it 7 times faster than before in backend parts.

04/2016 – 12/2016
Morrisville, North
Carolina,
United States

Junior Developer

Trial Card (MindTree) [↗](#)

- Took part in Designing rich user interface applications using JavaScript, jQuery, CSS, HTML and AJAX.
- Created and maintained the Admin page for central management of the application using React for frontend and Node.js for backend.
- Designed complex databases and generated optimized sql queries to fetch necessary data for the medical business.
- Developed microservices for medical business in PHP and used MySQL as a database.
