WORK EXPERIENCE

System Engineer

Tata consultancy services

06/2021 - Present,

Achievements/Tasks

- Working on Java application project for general electric company- the application contains all new requirement for GE, according to each requirement new project is created and project contains all details for specific req. the application handles current/approvals status to track the req. once all the approvals are completed we can proceed to release the order. my job was to fully support the project single handedly- analyze the requirement, customize the application code as per the client requirement, test the code, deploy it and provide Go-live support. It was both technical and functional work related to the application.
- Technology stack being used: Java,javascript and MySQL.
- Worked on tools like Eclipse,putty and sql

Worked on AWS services - EC2 , S3 , VPC , Cloud Formation etc.
