Casper Lu
Senior Software Engineer

SUMMARY

I'm a senior software engineer with 8+ years of engine, full-stack develop experience and 7+ years of PM experience. Self-motivated and self-taught professional who likes to solve difficult problem, creative & open-mind. An experienced PM who has taken a leading role in the development of flexible and perfect smart contracts. Full-Stack Developer with five years of experience leading both front-end and back-end development, and performing quality assurance.

PROFESSIONAL EXPERIENCE

Nokri Job Portal

May '15 - Mar '16

Lead Developer

Remote Work

Wordpress, Java, Swift, Android, Iphone, Google Firebase

web: <https://jobs.nokriwp.com>

Achievements:

- Devised documentation for each app, detailing operation aspects, functions, capabilities and features.
- Designed database with mysql, and all workflows about web & mobile app.
- Devised techniques for better modularity, testability and maintainability of front-end applications.
- Tested applications prior to final review to verify issue resolution.
- Solved technical problems like Google map search option and added social media & share options.

Telmie

Apr '16 - Jan '17

Full Stack Developer

Remote Work

React, Google Firebase, Golang, MySQL, Gitlab

Telmie is the platform for communication-based services. We can call and accept calls on demand without booking. Flexible billing removes boundaries and encourages productive communication.

web: <https://www.telmie.com/>

Achievements:

- Created a complete project infrastructure for development, testing, deployment, and bug/issue tracking.
- Created a web service for online landing page construction and hosting.
- Developed api list to sync frontend and backend.
- Created unit testing and tested with team members.

Bluedrop Performance Learning

Mar '17 - Jul '18

Back-end Developer

Remote Work

Jasmine, PostgreSQL, Express.js, Node.js, JavaScript

Providing end-to-end training delivery and credential management for all training format. This can include virtual, online, in-person, and blended training.

web: <https://bluedrop.com/>

Achievements:

- Developed a RESTful API server using Node.js.
- Implemented internationalization on both front-end and back-end sides.
- Tested back-end using Mocha.

Kamermans Holding

Aug '18 - Jan '19

Lead Developer

Remote Work

reactjs, redux thunk, laravel, web3, smartcontracts, solidity, hardhat

Decentralized Exchange Platform where companies registered in the Caribbean can list ERC 20 tokens.

Web: <https://calahex.com>

Achievements:

- Designed architecture & DB & UI/UX from scratch with my last experience above myself.
- Suggested and implemented AI based financial solutions to avoid risk from high changing price of cryptocurrency pairs.
- Developed smart contracts for ERC 20 tokens exchange and management.
- Recommended to my team members talented & well experienced developers on this project and lead them as a PM to archive completion of CALAHEX v1.0.

LearnBots App

Mar '19 - Feb '20

Frontend & Mobile Developer

Remote Work

Laravel, React.js, Flutter

This is Learning app about 101 verbs of 22 countries.

Web: <https://www.iedutainments.com/>

Achievements:

- Converted existing Titanium project to Flutter.
- Developed more friendly UI and made react frontend with same options.
- Implemented translate verbs system about 22 countries language using local storage.
- Created unit testing and tested with team members.

Roci Finance

Apr '20 - Jun '21

Lead Developer

Remote Work

smartcontracts, solidity, hardhat, reactjs, web3, redux saga

Web: <https://roci.fi/>

Liquidity protocol that provides lending, borrowing function with liquidity provide.

Achievements:

- Designed the Roci FI lending platform architecture and smart contract architecture from scratch focused on security and optimization.
- Suggested to use Proxy and Storage logic for smart contract security improvement and integrated openzeppelin to smart contract for security logic myself.
- Took part in smart contract development with contract developers for lending platform contract and developed NFT based User wallet score generate off chain application using Oracle myself and integrate this into lending platform.

Synesis One

Jun '21 - Apr '22

Lead Developer

Remote Work

reactjs, typescript, rust, solana, Express.js, Anchor, Unity3D

Web: <https://synesis.one/>

<https://www.kanon.exchange/>

<https://quantumnoesis.io/>

Blockchain Data yield farming, staking platform, NFT marketplace, NFT Game.

Achievements:

- Developed data yield farming smart contract using Rust on Solana network especially focusing on code & storage optimizing.
- Developed NFTs marketplace smart contract using Anchor Rust framework.
- Developed frontend using React.js / Typescript and integrate phantom wallet for Solana network integration.
- Integrated Rust based Solana smart contract into frontend which includes data yield farming logic.
- Took part in the NFT Game development using Unity3D.

KEY SKILLS

- Results-oriented
- Revenue generation
- Clean architecture
- High quality code
- Deadline focused work
- Self motivated and self taught
- Open-mind with new technologies and challenges

- Team work & communication
- Problem solve
- Creative Idea

TECHNICAL SKILLS

Blockchain

Smart Contract

Solidity

Rust

React.js

Next.js

Vue.js

Express.js

Laravel

Golang

Php

Node.js

Django

Python

Web3

Flutter

React-Native

Unity3D

VR/AR/XR

Hardhat

Java

Spring

Swift

NFT

Unit Testing

Application

- CEFI, DEFI
- NFT Marketplace
- Web & Mobile project
- 3D & Game project
- VR/AR/XR project
- AI project

EDUCATION

Bachelor's degree in computer science

Apr '11 - May '15

The University of Hong Kong

Pok Fu Lam, Hong Kong

Focused on data structure and algorithm science

When I was a student, I tried to get skills such as computer science, math and statistics to become a good software engineer. After graduated from university, I have been started on several companies.
