

Mark Ong

Senior Software Engineer

Email: markongdev@gmail.com

Phone: +19364635047

Location: SS 16, Subang Jaya, Selangor, Kuala Lumpur, Malaysia

Summary

Mark is a top-notch full-stack engineer with several years of experience in computer science. He specializes in Javascript and its frameworks and libraries providing creative, sophisticated, effective, yet clean solutions using React.js, Vue.js, AngularJS and Node.js. Mark is also proficient in Django, Ruby on Rails, Laravel, GraphQL, NoSQL/SQL databases with an in-depth knowledge of the best practices for modern web applications. Mark is a natural problem solver, who has proven himself by successfully completing lots of projects for IT consultancies, software houses, web development agencies, and IT departments.

Technologies

- React.js & Vue.js & AngularJS
- Node.js
- Python / Django / Flask
- Ruby on Rails
- Laravel, Symfony, CakePHP, CodeIgniter
- HTML5 / CSS3, SASS / LESS, Web UI / UX Design, Twitter Bootstrap / Material UI / Zurb Foundation / Semantic UI / AntD
- PostgreSQL / MySQL / MongoDB / Neo4j
- Integration with 3rd party APIs (Payment Gateways, Google Map, Social Media)
- TDD & BDD
- GitFlow (GitHub, BitBucket)
- PM Tools (Jira, Asana, Trello, Pivotal Tracker)
- Continuous Integration (Jenkins, Travis, CircleCI)
- Linux/Unix Administration
- Amazon Web Services / Google Cloud / Azure
- CRM integrations (HubSpot / Salesforce / Outreach / ZoomInfo)

Education

University of Malaya (2006-2010) - Earned a Master of Science degree in Engineering.

Certificates

CompTIA Project+ (2009)

The project+ Certification confirms a project manager's knowledge of the entire project life cycle, from initiation and planning through execution, acceptance, support and closure.

Career history

Brandscopic – Software Engineer (2010.3 – 2013.1)

- Managed and worked on the back-end (Rails, Laravel) and front-end (Javascript) development and interacted on a daily basis with the clients and the other developers.
- Moved from using Rails controllers to build more scalable/isolated RESTful APIs using Grape and Sidekiq. While this allowed the application to be more scalable, spent time on reliability by adding many integration/unit tests for the new API.
- Developed and maintained the front-end functionality of websites.
- Participated in discussions with clients to clarify what they wanted.
- Designed prototypes for websites.
- Wrote cross-browser compliant XHTML, CSS, JavaScript, and CoffeeScript.
- Managed simultaneously several databases and reporting tools.
- Provided guidance to other team members on web development issues.
- Developed websites that have a consistent feel and look throughout all web properties.
- Provided technical support to end-users.
- Identified and corrected software deficiencies.
- Technologies: Ruby on Rails, Laravel, JavaScript, jQuery, CoffeeScript, HTML5, CSS3

ShyftWorks – Senior Software Engineer (2013.2 – 2015.9)

- Developed a single page front-end using React.js and Flux.
- Implemented the structure of an isomorphic React SPA.
- Integrated a token-based authentication workflow for the SPA.
- Developed the back-end using Node.js.
- Helped integrate third-party APIs including social media and Google Maps.
- Wrote unit tests using Jest and Enzyme.

- Technologies: React.js, Flux, Node.js, third-party API integration, Jest, Enzyme

The Because Market – Senior Software Engineer (2015.10 – 2018.12)

- Architected a React/Redux SPA and also implemented the complex business logic.
- Built a portal system and multiple funnels powered by React/Redux allowing users to explore various facets of their management accounts.
- Worked on multiple Node.js apps to build RESTful APIs, new features, various issues, and background jobs.
- Integrated various third-party apps (Shopify, Recurly, Sentry, and more) into multiple Node.js apps.
- Refactored the authentication logic and Redux store with Redux's architecture and a Redux auth wrapper.
- Worked on providing various documentation which helped with onboarding.
- Implemented Scrum/Agile development methodologies.
- Technologies: Node.js, React.js, Redux, React Hooks, React-Router, Redux-Saga, Redux-Thunk, Redux-Form, Reselect, Redux-Actions, Axios, JavaScript, HTML5/CSS3, PostgreSQL, Asyncio, Shopify, Recurly

WorldSportAction – Senior Software Engineer (2019.1 – 2020.10)

- Worked as a senior engineer and provided the best solutions.
- Built pixel-perfect front-end UI/UX using React, Redux, Typescript, and React Hook.
- Built back-end APIs using Node.js.
- Implemented middleware for regular check of database using Node.js.
- Implemented the script that performs the connections between the device and back-end using Node.js.
- Reviewed the pull requests submitted from the other developers for both front-end and back-end.

Apollo.io – Senior Software Engineer (2020.10 – 2022.1)

- Built an all-in-one platform using over 220 million contacts and 30 million companies to find and engage the future customers at the right time with the right message powered by React and Rails frameworks.
- Built rich-data-backed analytics system across sequences, messaging, sales reps, and so forth powered by React/Redux in a sales engagement team.
- Worked on multiple Rails apps to build RESTful APIs, new features, various issues, and background jobs.
- Integrated various third-party CRMs (Salesforce, Outreach, HubSpot, ZoomInfo, and more) into a Rails app.
- Worked on providing various documentation which helped with onboarding.
- Worked under Scrum/Agile development methodologies.

- Technologies: Ruby on Rails, React.js, Redux, React Hooks, React-Router, Redux-Saga, Redux-Thunk, Redux-Form, Reselect, Redux-Actions, Axios, JavaScript, HTML5/CSS3, PostgreSQL, Sidekiq, Chewy, jBuilder, Elastic Search, Redis, New Relic, PagerDuty, HubSpot, Salesforce, Outreach, ZoomInfo
