Christopher Groeneveldt

Senior Software Engineer

SUMMARY

I'm a senior software engineer.

I am an organized, collaborative and highly skilled full stack developer with 12+ years of professional experience in dynamic and deadline-driven work environments.

Self-motivated and self-taught professional who likes to solve difficult problem, creative & open-mind.

I have been working as a engine, full-stack developer and PM.

PROFESSIONAL EXPERIENCE

Lead developer

Oct '21 - Apr '22

SynesisOne

United States

Blockchain Data Staking & NFT Marketplace Platform

Blockchain Data yield farming and staking platform and NFT Marketplace platform

Web(Company): <https://www.synesis.one>

Web(Product): <https://www.kanon.exchange>

Tech-stack: Web (React.js / Typescript + Smart Contracts / Rust / Solana)

What I do:

As a lead developer, I designed and develop the infrastructure and well-formed project of data yield farming DApp and NFT marketplace DApp from scratch.

In the data yield farming DApp, I made able to users who staked SNS token (company token based on SOL) can post a question and also answers for each questions, and also can validate others answers.

If the answer validated then the user can get reward with SNS token and all the validated answers and questions are provided to the AI company as a training data.

In the NFT marketplace DApp, I made able to users can upload their collections via NFT minting and airdrop and also can buy the others collections via sales logic of marketplace.

I developed the smart contract of each platforms using Solana Anchor (Rust) mainly focused on code & storage optimization for less gas fee.

And developed the frontend using React.js / Typescript + Web3.js integrating phantom wallet connection.

Full-stack developer and PM

May '20 - Sep '21

Solstice

United States

Social Digital Product Marketing Platform

Social digital product marketing platform using NFT and stripe payment integration and social distribution

Web(Product): <https://www.solsapp.com>

Tech-stack: Web (React.js + Firebase + Node.js + IPFS + NFT + Smart Contracts / Rust / Solana)

What I do:

As a full-stack developer, I developed the NFT marketplace logic for digital product marketing using Solana (Rust) and Firebase for backend development using firestore.

And also implemented IPFS private/public logic and RSA algorithm based encryption for secure digital product management and product link distributing logic via social platforms - LinkedIn, Twitter, Youtube, Tiktok and phone sms (twilio.js) / email (email.js).

I made this platform let users can upload several kind of products (video, audio, image, doc, license, etc) and sell / buy products using card (FIAT) via stripe (stripe.js) or coin as they want.

And there are several kinds of selling logic (Legendary / Rare / Recurring / Free) for product marketing and bidding price logic and reselling logic for buyers and creators.

As a PM, I recommended team members (blockchain engineer, mobile engineer, QA tester) on this project and lead them as a PM to archive completion of MVP and v1.0

Lead developer

Sep '18 - Apr '20

Maxos

United States

LaunchPool Staking Platform

Accelerating investor engagement yield farming DApp

Web(Company): <https://www.maxos.studio>

Github: <https://github.com/christophergroe/LaunchPoolTrackerPlatform>

Tech-stack: Web (React.js / Redux-Saga + Web3.js + Smart Contracts / Solidity / Hardhat)

What I do:

As a Lead developer, I planned the smart contracts structure with separated contracts and Escrow contracts for security and audit and developed mainly part in smart contracts using Hardhat environment in Solidity.

I made this platform let companies can register new pool with their idea and investors can stake and confirm to their favorite pools in the list and all of these pool status are tracked and managed by the holding company.

I developed the smart contracts for company token based on ERC20 and NFT token based on ERC721 and deployed into 3 different networks and connect contract using Infura and Alchemy node.

And integrate contracts into FE using Web3.js and Metamask connection into React.js based project.

Full-stack developer

Feb '17 - Aug '18

Roci Finance

United States

Lending Platform

Liquidity protocol that provides lending, borrowing function with liquidity provide using NFT and Oracle

Web(Product): <https://www.roci.fi>

Github: <https://github.com/christophergroe/LiquidityPlatform>

Tech-stack: Web (React.js / Redux-Saga + Web3.js + Smart Contracts / Solidity / Hardhat)

What I do:

As a full-stack developer, I designed the Roci FI lending platform architecture and smart contract architecture from scratch focused on security and optimization.

I suggested to use Proxy and Storage logic for smart contract security improvement and integrated openzeppelin to smart contract for security logic myself.

I made this platform let users can lend money or liquidity provide to the platform and get the income after the contract finish and also can borrow money from the platform when they need it.

I implemented AMM logic for exchanging between the user token and company token.

I also took part in smart contract development with contract developers for lending platform contract and developed NFT based User wallet score generate off-chain application using Oracle myself and integrate this into lending platform.

Full-stack developer and PM

Oct '15 - Dec '16

Kamermans Holding

Aruba

CALAHX : Caribbean and Latin America Hybrid Cryptocurrency Exchange

Decentralized Exchange Platform where companies registered in the Caribbean can list ERC-20 tokens.

Web(Company): <https://www.kamhol.com>

Web(Product): <https://www.calahex.com>

Tech-stack: Web-CeFi (React.js / Redux-Thunk + Laravel), Web-DeFi (React.js + Web3.js + Smart Contracts)

What I do:

As a full-stack developer, I have designed architecture & DB & UI/UX from scratch with my last experience above myself.

I made this exchange platform (hybrid - Centralized and Decentralized) let users can deposit and withdraw several kinds of coins (BTC, ETH, USDT, USDC, DAI, etc) and convert / exchange these tokens and ERC20 tokens as the bidding price or market price.

I have also suggested and implemented AI based financial solutions to avoid risk from high-changing price of cryptocurrency pairs.

And I have developed smart contracts for ERC-20 tokens exchange and management.

As a PM, I recommended my team members (talented & well-experienced developers) on this project and lead them as a PM to archive completion of CALAHEX v1.0

Senior Full-stack developer

Jul '14 - Sep '15

Telmie

United Kingdom

Communication based Learning Platform

Marketplace and a telecommunications Platform that offers paid video chat and voice calls with experts in any field

Web(Product): <https://www.telmie.com>

Mobile(iPhone): <https://apps.apple.com/gb/app/telmie/id1345950689>

Tech-stack: Web (React.js / Next.js + Node.js + WebRTC + Zapier), Mobile (Flutter)

What I do:

This is all-in-one platform and bespoke matching service that combines the best of online, video and face-to-face learning and online marketplace for professional services in real-time.

As a senior full-stack developer, I have upgraded the video call speed and quality by integrating new WebRTC library and implement blockchain tech based chat function for safety and private chat.

And I make Zapier app to integrate telmie platform chat and booking system with gmail and google calendar automatically.

And upgraded the metronic theme based frontend into React.js/Next.js based frontend and speed up, optimize website.

I developed the mobile hybrid app (Android & iOS) using React-Native and published to app store and play store.

Full-stack developer

Mar '13 - Jun '14

Designhubz

United Kingdom

AR based eCommerce Website

AR & 3D model product based eCommerce store

Web(Product): <https://www.designhubz.com>

Tech-stack: Web (Woocommerce + Three.js + Unity/AR)

What I do:

As a full-stack developer, I developed 3D based products using Three.js with the function - zoom, move, rotates and make able to change 3D product color not only entire product but also partial color as clients want.

And also developed Unity engine for AR based 3D product management (Footwear AR, Eyewear AR, Makeup AR, 3D & AR shopping etc) and AI engines which detect the product suits for the client or not using ML python torch library for computer vision.

And I developed the ecommerce website using woocommerce for the 3D & AR based products marketing.

I made this platform let users can check the product as a 3D vision and can change the product features as they want and try it on their face or body or put the product in their room anywhere and check it suits for them or not on the website and mobile application.

Full-stack ML developer

Feb '11 - Nov '12

Dermoi

United Kingdom

Face detection based Make-up & Treatment Platform

Face feature detection based mark-up & treatment website

Web: <https://dermoi.com>

Mobile(iPhone): <https://apps.apple.com/us/app/dermoi-therapist/id1400669843>

Tech-stack: Web (React.js / Next.js + Django + Python / Tensorflow), Mobile (React Native)

What I do:

As a full-stack ML developer, I have developed face feature detection engine using Python Tensorflow integrate into platform.

I made this platform let clients can detect their face features automatically from their image and order with correct treatment and mark-up plan.

And also provide the imagination image of the face after treatment and mark-up so that they can select proper method for their special face features and then a certified and vetted facial aesthetician will come to client home and achieve real transformation at a cellular level.

And I upgraded ongoing platform UI into React.js / Next.js from normal bootstrap theme based UI.

EDUCATION

Bachelor of Computer Science
State University Of New York Empire State College

Jul '05 - Apr '09
United States

KEY SKILLS

- AI
- VR/AR
- Web
- Mobile
- Finance
- Blockchain

TECHNICAL SKILLS

- Bitcoin
- Ethereum
- Solana
- Smart Contracts
- Web3
- Solidity
- Rust
- DeFI
- NFT
- Python
- ML/DL
- Python
- React
- Typescript
- GraphQL
- MongoDB
- Node.js/Express.js
- MERN
- IPFS
- Firebase
- Laravel
- PHP
- Hardhat
- Truffle
- Anchor
- Substrate
- Three.js
- VR
- AR
- Unity
