Unity Game Programmer

SUMMARY

Sava has been developing games for 4 years, most of which were spent exclusively in Unity3D. He has done substantial work in extending Unity3D's functionality, robustly implementing traditional C# paradigms via Unity's user interface. He is an articulate, effective communicator who prides himself on his creativity and flexibility throughout all phases of development, and enjoys working on teams of all sizes.

PROFESSIONAL EXPERIENCE

Lead Programmer

Nov '21 - Present

TOPGAMES PUBLISHING LLC

WY, US

- Developed system architecture and implementation for a BIM-based augmented reality software for quality assurance in architecture, engineering, construction, and facility management industries.
- Hired and managed back end, unity, and graphics development team. Was responsible for the strategy of further product development. Directly acquired new partners and potential clients.
- Designed and implemented augmented reality "viewers" for iOS, Android, DAQRI, and Hololens (ARKit, ARCore, MRTK).
- Designed and implemented a 3D front-end dashboard to view visualize 3D IFC facility models and the sensory/QA data associated with that facility.

Game Programmer

May '20 - Mar '21

Plop! Studio

Peru, IN

Game Development & Project Delivery

- Developing the gameplay and mechanics for 10+ projects in collaboration with a team of 12+ personnels
- Programming video game aspects**, including sound, graphics, scripts, interface, etc. to increase the user experience by 15%
- Implementing **gameplay** that includes combat dynamics, logic script, and movement for 10+ game characters

Research & Team Collaboration

- Conducting **research** with respect to **statistics** and **demographics** of the game for determining the appropriate gameplay
- Collaborating with the Research and Development team of 7 professionals for futuristic gaming experience

Game Testing & Troubleshooting

- Performing an instrumental role in **troubleshooting game programs** to deliver error-free gaming experience for 1k+ users
- Overseeing the **testing** of 4+ **video games** on a weekly basis to ensure compliance with industry standards

Game Programmer

Jun '18 - Apr '20

MiddleMan Games

Amsterdam, Netherlands

Coding

- Wrote **code** for **gaming software** in different genres for global market and clients
- Utilised advanced computer languages with **2D & 3D graphics** for coding and delivering with optimal precision.

Game Programming & Debugging

- **Programmed** and **tested 10+ games** for kids to learn better and ensured its quality for facilitating better performance
- Identified the bugs and resolved **technical issues** in the final stages of game development process in the **beta version**
- **Coordinated** with the **technical and designing teams** as a part of deliverng projects within stipulated time-frame and budget

EDUCATION

B.S in Computer Graphics	Jul '15 - May '18
Belgrade University	Belgrade, Serbia
B.S. in Computer Science	Jan '13 - Mar '15
Belgrade University	Belgrade, Serbia

Course

Plop! Studio	May '20 - Mar '21
Course Modules	Peru

Core Computer Science | Core Game Development | Game Development Infrastructure

MiddleMan Games	May '18 - Apr '20
Course Modules	Amsterdam, Netherlands

Game Production | Visual Design For Games and Interactive | Computer Animation | Video Game Programming
Game Hardware Architectures | Game Engine Programming | Serious Game Development
Introductory and Intermediate Game Design

CERTIFICATIONS

- Expert Game Programmer Certification | Unity | Jun '20
- Associate Certified Game Programmer | Unity | Jun '19

KEY SKILLS

- Game Application Development • Game Designing & Testing • Game Programming • Project Delivery • Quality Assurance
- Database Management • Software Testing • Issue Resolution • VR & AR • Coding • Software Integration

Technical Skills

- - Participate in Requirements gathering and User Experience development skills
- - Strong general programming skills- preferably in C# and Java
- - Strong knowledge of 3D mathematics and good Logical and Analytical skills
- - Excellent programming skills in Unity & C#, understanding of OOP and coding best practices
- - Excellent and current programming skills. C/C++, C#
- - Oracle/MS SQL Server application development and very strong database design skills
- - Excellent teamwork skills, flexibility, and ability to handle multiple tasks

- - Experience in shipping games or simulations in 3D
- - Excellent problem solving, critical thinking and communicate effectively, both written and verbal with technical and non-technical multi-functional team members
- - VR/AR headset development experience
- Experience with AI systems
- Experience with Character animations
- **Unity, C#, C/C++, Java, Python, SQL, PHP, Go, CSS, HTML, Javascript, Frontend Development**

Additional Information

- **Languages:** English (Fluent), Serbian(Native)
