Experience

Full stack developer – [Atronas ApS](#)
laravel, reactjs, flask, mysql

Jan 2017 → Current

As a cloud engineer and full stack developer, I developed Hosting Cloud engine and SAP NetWeaver with team members. And developed the dashboard for SAP service platform from scratch using Laravel + React(Embedded mode) and Flask for backend framework.

Lead Developer – [Africunia Bank](#)
reactjs, ruby-on-rails, smartcontracts, web3js, mongodb

Jan 2020 → May 2021

As a lead developer, I have upgraded entire ongoing banking platform v1.0 into v2.0. New features of version 2.0 are integrate ERC-20 & TRC-20 tokens with smart contract using solidity into ongoing platform (only use BTC, BCH before) and upgrade frontend into Vue.js integrating smart contract using web3.js. I provide solution to improve UI/UX design to let newly users can realize and use our platform much more easier by implement AI based high profit experienced client mirroring function. And make trading UI much simpler than v1.0

Full stack developer – [Telmie](#)
reactjs, next.js, node.js, express, webRTC, zapier, mongodb

Sep 2019 → Mar 2021

As a full stack developer, I have upgraded the video call speed and quality by integrating new WebRTC library and implement blockchain tech based chat function for safety and private chat.

And I make Zapier app to integrate telmie platform chat and booking system with gmail and google calendar automatically. And upgraded the metronic theme based frontend into React.js/Next.js based frontend and speed up, optimize website.

Website developer – [Fourreasons](#)
shopify

Aug 2019 → Nov 2019

I have made this website from scratch using Shopify themes - Handy (Minimalist style : product detail), Beyond (Grid-style layout : product list)

Website developer – [Technocity \(PVT\) Ltd](#)
prestashop

Jan 2019 → Aug 2019

I have made this website from scratch using Prestashop theme - Abelo (Digital Responsive theme)

Front end developer – [The Story Lab](#)
reactjs, next.js, cypress

Jan 2018 → Aug 2019

As a frontend developer, I integrated firebase database and email authentication logic into FE. And also integrated customized google map into FE to track story owners position and distributed users position. Also designed FE-test system and developed Cypress CI/CD pipeline and testcases for whole pages from scratch.

Full stack developer – [Tokuoka Co. Ltd](#)
laravel, bootstrap-4

Jan 2017 → Oct 2018

As a Full-stack developer, I have developed entire ecommerce platform from scratch. New features of Platform are integrate PDF generator for wine description and wine detail search I provide solution to add 'barryvdh/laravel-dompdf' and 'maatwebsite/excel' search functionality that user can search easily I developed wine ecommerce platform using Bootstrap slider, Bootstrap4 datatable Image picker

Full stack developer – [Nabu](#)
vue.js, go, three.js, unity3d, postgresql

Mar 2017 → Nov 2017

As a full-stack developer, I developed the 3D VR engine using Unity and integrate into frontend using three.js. And I optimized the website speed by frontend code structure optimization and use faster hosting service.

Full stack developer – Trackshore limited
node.js, express, vue.js, mongodb, python, pytorch

May 2016 → Feb 2017

As a full-stack developer, I developed ML based tracking engine using Python PyTorch library and integrate into Node.js/Express.js backend. And Integrate Restful APIs for tracking into backend and make full test-case driven FE using Vue.js + Cypress.

Education

Bachelor's degree – Tsinghua University
computer-science, project-management

2011 → 2015

Received Bachelor's degree of Computer Science and Business management. And took part in ACM-ICPC World Final.
